

# NovaChargeX Unveils Groundbreaking Patented Energy System in Turkey

*NovaChargeX launches a patented hybrid energy system delivering up to 34 kW/day — starting with a live showcase in Turkey.*

SAN FRANCISCO , CA, UNITED STATES, May 20, 2025 /EINPresswire.com/ -- [NovaChargeX](#) today

“

This isn't an improvement — it's a reinvention of renewable energy. NovaChargeX is here to challenge the limits and deliver power anywhere, anytime, without compromise.”

*Mike Yaqub, Founder,  
Chairman & CEO of  
NovaChargeX*

unveils its revolutionary, patented hybrid energy system, redefining what's possible in renewable power generation. Designed to deliver continuous, high-efficiency output with minimal input, the NovaChargeX system is now ready for global deployment — starting with a live showcase in Turkey.

The system combines innovative engineering, smart energy control, and a hybrid input approach to achieve what was once thought impossible:

Up to 34 kW of clean, stable energy per day from a compact, scalable system.

Built from the ground up and protected by international patents, the NovaChargeX system delivers:

24/7 Autonomous Operation

Input Flexibility (solar, kinetic, hybrid sources)

High-Efficiency Output at Over 90% System Stability

Ultra-Compact Design for Homes, Businesses & Industrial Use

No Reliance on Traditional Grid Infrastructure

This announcement marks a major milestone in the shift toward energy independence and sustainability. The system will be showcased in a live demonstration in Turkey — with global media, companies, and governments invited to witness the future of energy firsthand.

The company is now opening discussions for exclusive licensing, government partnerships, and mass deployment opportunities worldwide.
