What Drives The Quick Commerce Market Growth?

The transformation of the e-commerce industry and the

surge of online shopping are major contributing factors to the growth of the quick commerce market. E-Commerce, the buying and selling of goods and services over the Internet and online shopping, the act of purchasing products or services through websites or mobile applications are continuously expanding. This expansion is driven by increased internet and mobile device penetration, advancements in technology, improved logistics and delivery services, and the convenience of shopping from home. Quick Commerce enables rapid on-demand delivery of online goods and services to consumers, enhancing convenience, and meeting immediate needs, which has been fueling its market growth.
