

Bridgewater Associates and Global Citizen Launch 'Forecasting the Future: A Modern Economics Challenge'

Bridgewater and Global Citizen Call on the Next Generation with Global Prediction Challenge to Evaluate Impacts of Economic Transformations

JOHANNESBURG, SOUTH AFRICA, May 20, 2025 /EINPresswire.com/ -- Today, Bridgewater Associates, one of the largest, most successful hedge funds of all-time, in partnership with Global Citizen, the world's leading international advocacy organisation, announced the launch of an ambitious new global economics challenge, Forecasting the Future: A Modern Economics Challenge. This new global prediction challenge invites applicants

from around the world to participate in Bridgewater's idea meritocracy, where a good idea can come from anyone anywhere, to tackle one of the most significant global economic transformations of our time.

As the world transitions away from the era of globalisation that defined the last five decades, Bridgewater has identified a new paradigm emerging, Modern Mercantilism. Marked by rising protectionism and restructured trade relationships, this transformational shift is happening amidst the rise of rapidly evolving technologies such as artificial intelligence and is redefining global economic systems, institutions, and power structures.

In response to this global shift, Forecasting the Future: A Modern Economics Challenge invites participants to analyse the impact of these changes in global trade, geopolitics, and technologies. Challenge submissions are asked to forecast which countries, sectors, or populations will be most affected by the transition to Modern Mercantilism, and to identify the risks and implications policymakers must prepare for in a world shaped by new rules, technologies, and global power structures.

Full submission and judging criteria are available here.

Bridgewater and Global Citizen will review submissions and select the top one hundred based on the quality of the forecast. Senior Investors at Bridgewater will then evaluate the finalists and award \$25,000 to each of the top five submissions. *The winners will also receive an employment or internship opportunity at Bridgewater, pending successful completion of its interview requirements.

"As we live through one of the most significant paradigm shifts of our lifetimes, Bridgewater is more dedicated than ever to understand the impact it will have on markets and economies," said Nir Bar Dea, CEO, Bridgewater Associates. We have always done that through having a great meritocracy where the best ideas win, no matter who they come from. "Together with Global Citizen, we are looking for the brightest minds across the world to contribute their understanding of the challenges and opportunities that lie ahead and to join us as we navigate the future of this new world order."

"The world is entering a new era – defined by shifting alliances, disruptive technologies, and evolving global power structures. These changes bring both challenges and opportunities, especially for the world's most vulnerable communities," said Hugh Evans, Co-Founder & CEO, Global Citizen. "With Forecasting the Future, we're inviting bold, data-driven ideas from around the world – because the next breakthrough insight can come from anyone, anywhere."

Last year, Bridgewater and Global Citizen partnered to publish research supporting the World Bank's IDA21 replenishment, helping secure a record \$100 billion commitment. This year, the partnership expands through the Forecasting the Future: A Modern Economics Challenge to tackle the world's most pressing issues, driven by a shared belief that solving today's biggest challenge, and unlocking tomorrow's opportunities, requires a deep understanding of how the world is changing and the forces shaping our future.

Closing date for submissions is August 1, 2025.
