Highway, Street, And Bridge Construction Global  
Market Report 2025

The highway, street, and bridge construction industry has witnessed steady growth over the years and continues to present promising prospects for the future. Stemming from a value of \$896.06 billion in 2024, it is projected to grow to \$938.05 billion in 2025, marking a compound annual growth rate CAGR of 4.7%. This historical period growth can be attributed to factors such as population growth and urbanization, aged infrastructure replacement, government funding and initiatives, transportation network enhancement, and economic development goals.

What does the future hold for the [highway, street, and bridge construction market?](#)

The highway, street, and bridge construction market is teeming with potential growth in the forthcoming years. It is projected to skyrocket to a formidable \$1151.74 billion by 2029, guided by an annual growth rate of 5.3%. This forecasted growth phase is attributed to novel smart city initiatives, a heightened focus on environmental sustainability, increased urban mobility solutions, resilience and climate adaptation, and private sector participation. Other noteworthy trends for the forecast period include the incorporation of innovative materials and composites, collaboration with public-private partnerships PPPs, a heightened focus on safety and intelligent construction equipment, the adoption of 3D printing in construction, and the introduction of sustainable transportation infrastructure financing.
