

Terradepth awarded 5-year contract in global offshore energy

Company's integrated ODaaS solution delivers seabed data collection and management capability at fraction of traditional survey cost and time

AUSTIN, OH, UNITED STATES, May 21, 2025 /EINPresswire.com/ -- [Terradepth](https://Terradepth.com), a leading provider of Ocean Data as a Service® (ODaaS), was awarded a five-year Master Services Agreement with a major offshore energy company. Terradepth will deliver autonomous hydrographic survey and data services at a fraction of the traditional hydrographic survey time and cost. The first project is for a liquefied natural gas (LNG) export terminal in the Asia Pacific (APAC) region.

The project leverages the company's ODaaS vertically integrated solution, from robotic autonomous subsea data collection capability to delivery of processed data through the [Absolute Ocean](#)® platform—a secure, cloud-native environment for scalable subsea data visualization and management. This integrated workflow enables all necessary stakeholders to gain insights from the bathymetric data to conduct safe and sustainable operations.

“

This engagement validates Terradepth's value proposition of a complete solution at a much lower cost: autonomous data acquisition delivered through a secure, cloud-native data platform.”

Kris Rydberg, chief operating officer at Terradepth

“This engagement validates Terradepth's value proposition of a complete solution at a much lower cost: autonomous data acquisition delivered through a secure, cloud-native data platform,” said Kris Rydberg, chief operating officer at Terradepth. “With Ocean Data as a Service, we're solving subsea operations challenges—cost, speed, access, and

repeatability—across government and infrastructure-intensive commercial sectors like offshore energy, subsea fiber and electric cable with a scalable, integrated solution.”

For more information about this integration, visit <https://www.terradepth.com/absolute-ocean>.

About Terradepth, Inc.

Terradepth delivers ocean data better than humanly possible through its innovative technologies. They push the boundaries of ocean exploration with complete ODaaS (Ocean Data as a Service®) solutions of autonomous underwater vehicles, streamlined survey services, and cloud-based geospatial data management. Operating globally from Austin, TX and Panama City Beach, FL, Terradepth is transforming underwater exploration, yielding faster and smarter maritime decisions and safer waters.
