CA, UNITED STATES, May 21, 2025 / EINPresswire.com/ -- In a world teetering on global and national instability, award winning author [John M. Capozzi](#) brings a sobering thought to the public and to government leaders about a real threat in his the public in his thriller whose title says it all, [America At Risk](#): See Something, Say Something about the real risk of a Weapon of Mass destruction being used in America.

The horrifying prospect of a terrorist, with the help of oil money, entering America with a WMD at one of its four very porous borders is the theme of Capozzi's extremely exciting new novel. America At Risk draws with devastating accuracy a disturbing picture depicting a fictional president fighting a race against time to outplay Iran and prevent an unimaginable disaster which could transform cities such as New York, Washington D.C and even Los Angeles into rubble, and plunging the country into anarchy.
