

HelloGard Launches HelloGard Intelligence: AI Platform to Revolutionize Robot Fleet Management Across Industries

HelloGard launches HelloGard Intelligence, a unified AI platform that simplifies and streamlines robot fleet management across all industries.

AUSTIN, TX, UNITED STATES, May 27, 2025 /EINPresswire.com/ -- HelloGard Robotics is proud to announce the official launch of [HelloGard Intelligence](#), a groundbreaking new AI platform that consolidates robot fleet management into a single, streamlined interface. Designed for businesses operating diverse fleets, HelloGard Intelligence enables real-time monitoring, remote mapping, data integration, preventative maintenance, and seamless control from one centralized command center.

The platform is already being deployed at the prestigious Inn of the Mountain Gods Resort & Casino (IMG), where training is currently underway for their operations team.

“Managing robots from different brands used to require logging into multiple portals, slowing down operations and creating unnecessary complexity,” said Sanjeev Shetty, Co-Founder and CEO of HelloGard Robotics. “With HelloGard Intelligence, we’ve eliminated those silos. Businesses can now manage all their robots from a single dashboard to provide a better customer experience—saving time, reducing operational friction, and increasing ROI.”

IMG is the first of many multi-industry businesses embracing this innovative platform. Their leadership sees HelloGard Intelligence as a critical step toward future-proofing their operations.

“We’re excited to be early adopters of HelloGard Intelligence,” said Elgin Toclanny, Director of Hotel Operations at Inn of the Mountain Gods. “It gives us a smarter, faster way to run our hospitality robotics. Centralized monitoring, real-time data, and simplified reporting—this is exactly the kind of tool modern operations teams need.”

What Sets HelloGard Intelligence Apart

Built to serve all-inclusive industries—from hospitality and healthcare to logistics and retail—HelloGard Intelligence offers a complete solution for managing mixed-robot environments.

Key value points include:

- Unified Monitoring – Manage your entire robot fleet from one central hub, reducing complexity and boosting visibility.
- Faster Scalability – Grow operations effortlessly without adding overhead or new tech teams.
- Proactive Insights – Gain actionable intelligence to optimize performance, detect issues faster, and enhance ROI.
- Time is Money – Troubleshoot less and focus more on delivering great customer experiences.

Key Features Businesses Can Count On:

- Centralized Command – A single dashboard to view and control your entire robot ecosystem, regardless of brand or model.
- Data Aggregation – Consolidates data from all robot types, giving you holistic insight for smarter, faster decision-making.
- Customizable Alerts – Stay informed with real-time performance updates and preventative maintenance notifications to reduce downtime.
- Scalability-Ready – Built to grow with your business—scale your fleet without increasing operational complexity.
- Streamlined Support – Faster troubleshooting and reduced support tickets through centralized oversight and real-time visibility.
- E-Learning Capabilities – On-demand training ensures your team stays up to speed—even with high staff turnover or multiple locations.
- Robot Orchestration – Coordinate multiple robots across different roles with intelligent task scheduling and automation.
- Predictive Maintenance – Detects and resolves issues before they impact operations, using smart diagnostics and usage patterns.
- Remote Mapping – Update and reconfigure robot navigation remotely—no on-site technician needed.
- Last-Mile Logistics Delivery – Optimize indoor delivery workflows in complex environments like warehouses, airports, and resorts.
- Smart Scheduling – Automate routines and assign the right robot to the right job at the right time for maximum efficiency.

The Future of Fleet Management Starts Now

Designed on a unified data and interface platform, HelloGard Intelligence supports seamless access for all users with just one login. It can be used directly through the HelloGard application or integrated into existing infrastructure via API, offering unmatched flexibility and efficiency.

This launch marks a pivotal evolution in HelloGard's roadmap. Going forward, HelloGard

Intelligence will be a standard offering for all future robot deployments—enabling smarter support, tighter control, and greater value across every vertical.
