

Revolutionizing Energy-Efficiency Homes: Windotek Australia is Named a Top Window Company for 2025 by ThreeBestRated®

QUEANBEYAN, NEW SOUTH WALES, AUSTRALIA, May 26, 2025

/EINPresswire.com/ -- Windows cover 25% to 30% of a home, making it necessary for one to invest in the right windows not only for comfort, but also to save on bills. Windotek, a Queanbeyan-based company, works with a primary goal of reducing energy in the homes of Australia by offering high-quality window solutions.

Windotek Australia

"We are determined to serve our community in the best possible ways that we can think of when it comes to maximizing and improving energy efficiency for homes," said Yu Tee, the founder of Windotek company.

“

We are determined to serve our community in the best possible ways that we can think of when it comes to maximizing and improving energy efficiency for homes.”

Yu Tee

Windotek is a fully licensed and insured company that has been fabricator-registered with Australian Glass and Window Station and the UPBC Alliance of Australia. They have been in the windows and doors industry since 2018—totalling 8 years of experience. They specialize in manufacturing, supplying and installation of energy-efficient windows and door systems. Be it new build homes or existing homes, their core objective is to maximize and improve energy efficiency for homes in Queanbeyan—which is what makes them stand out as the

cream of the crop in their industry.

How Does Windotek Achieve Energy-Efficiency?

Following their core objective, they focus on UPVC (Unplasticized Polyvinyl Chloride) double and

triple-glazed windows and doors. The reason is simple. According to Yu Tee, Australian homes still have single-pane windows with aluminium and timber frames that are too old and outdated. Yu Tee noticed the high demand for innovative solutions that combine energy efficiency and high functionality, which led him to specialize in UPVC windows and doors. These windows offer several benefits to the homeowners.

>> They are maintenance-free.

>> They provide excellent thermal efficiency, meaning they keep the home warmer in winter and cooler in summer.

>> They are better at withstanding the harsh climates of Australia.

>> They are UV-rated and tested, which is in line with strict Australian Standards.

Windotek's UPVC windows and doors have proved to bring drastic changes to the homes. They have worked excellently in keeping the temperature ideal for comfort living and reducing the energy bills. Moreover, as these windows are aesthetically appealing and increase the property value, Yu Tee calls it a great investment.

"Basically, the energy-efficient solution through our windows is massive because, when you upgrade your house with double glazing, especially with UPVC high-performing windows, you're gonna save on bills. It's also going to appreciate the value of the property. So basically, in the long run, it's a very good investment."

Personal Experiment Done for Satisfaction

Yu Tee is committed to excellence in what he is doing. He personally conducted a test with his products. In one home, the pre-installation temperature was recorded to 4°C. After finishing retrofitting the home, the home's temperature surprisingly rose to 14°C —10 degrees higher than it had been with previous windows, without any additional heating system.

"It's a huge climb up in terms of ambient temperature and comfort for the home. So we are very sure that our windows are doing really well when it comes to maintaining warmth in winter and retaining coolness in summer."

Not only in Queanbeyan, but also in Canberra and surrounding regions, the team has upgraded countless homes, where homeowners experienced dramatic improvements after installation. Besides offering energy-efficient solutions, Windotek stands behind their quality by offering a minimum warranty of 10 years on all of their products, workmanship, hardware fitting and mechanism of the windows. Plus, the exterior color is covered for 20 years.

A Honor that Validates Windotek's Mission

Windotek's dedication to serving the community and their consistent performance have earned them the prestigious [ThreeBestRated®](#) award for 2025. They have been upholding this award continuously since 2021. "Thank you very much ThreeBestRated®, for bringing us forward. It has been a journey of about six years now and we're flabbergasted to be picked as the top three window companies in Queanbeyan and the surrounding region."

"We will commit ourselves to providing the best of solutions, best of technology in terms of windows and door systems in the future, and we are working hard to bring in more innovative solutions for building better homes for our community."

Windotek serves Queanbeyan, Canberra and their surrounding areas. To learn more about the team and their products, visit windotek.com.au.
