

Pre-orders for the 'Bioboosted Armor Guyver Guyver II F(Female)' Statue Began May 29, 2025

Prime 1 Studio has announced the "Bioboosted Armor Guyver Guyver II F(Female)" statue. Pre-orders began May 29, 2025 (JST); release set for December 2026.

ASAKUSA, TAITO-KU, TOKYO, JAPAN, May 30, 2025 /EINPresswire.com/ -- To commemorate the 40th anniversary of the science fiction manga "Bio Booster Armor Guyver," first serialized in 1985 and created by Yoshiki Takaya, Guyver IIF(Female) has been brought to life as a statue in the "Ultimate Premium Masterline" series.

Ultimate Premium Masterline Bioboosted Armor Guyver Guyver II F(Female)

This 1/4 scale piece faithfully captures the lithe yet powerful form of the Guyver IIF, the bio-boosted armor equipped by Valkyria Forsberg Lisker. The armor's purple coloration is finished with layered gradients and shading to emphasize depth, while the central Control Medal features a metallic plating that replicates a realistic metal texture. The statue also includes two sets of high-frequency blades—one long and one short—for both the left and right arms, allowing for display customization.

The base is inspired by the modified Hyper Zoanoid "Zerbebuth-R," an enemy who battles Guyver IIF in the manga. The damaged remains of the defeated creature are used to represent Guyver IIF's formidable combat strength and cold precision. Zerbebuth-R's high-frequency claw on the right arm and heat cannon on the left are carefully sculpted and painted, contributing a strong presence that visually balances with the main statue and enhances the dramatic impact of the overall composition.

Additionally, the bonus version includes an alternate head part featuring an exposed face with part of the armor opened. The large eyes and closed lips are intricately detailed, quietly reflecting the character's inner nature through subtle expression.
