Intravenous (IV) Ibuprofen Global Market Report 2025
- Market Size, Trends, And Global Forecast 2025-2034

The Business Research Company's latest report explores the rapid growth of the intravenous IV ibuprofen market size in recent years. The market, which stood at \$8.35 billion in 2024, is

“

It will grow to \$14.86 billion in 2029 at a compound annual growth rate (CAGR) of 12.1%.”

The Business Research Company

projected to grow to \$9.4 billion in 2025 at a compound annual growth rate CAGR of 12.5%. This significant growth in the historic period can be ascribed to increasing prevalence of chronic diseases, escalation in surgical procedures, an emphasis on reducing opioid usage, rising per capita income, and burgeoning medical tourism.

Where Is The Intravenous IV Ibuprofen Market Headed?

The intravenous IV ibuprofen market is anticipated to see

accelerated growth over the next few years. Its projected value by 2029 estimates to \$14.86 billion, growing at a compound annual growth rate CAGR of 12.1%. The growth drivers in the forecast period include increasing healthcare investments, an upsurge in pediatric patients, rising prevalence of pain and fever, an increasing geriatric population and the adoption of advanced pharmaceutical treatments.

What Are The Major [Intravenous IV Ibuprofen Market Trends](#)?

Advanced therapeutic solutions, single-dose formulations, progress in personalized medicine, integration into multimodal pain management protocols, and advancement in combination therapies are expected to shape the future of the market.

The intravenous IV ibuprofen market is further fueled by the rising prevalence of pain disorders. These disorders, often caused by nerve, musculoskeletal, or inflammatory issues, lead to persistent or chronic pain affecting daily functioning. Considering our aging population, with older adults more prone to chronic conditions like arthritis, osteoarthritis, and nerve pain, the demand for effective pain relief increases. Intravenous ibuprofen is an effective aid providing swift relief, making it suitable for acute and postoperative pain.
