# FactorFox, FactorEvo & Trucker Copilot Ally with Farelanes to Deliver Smarter Routing & Data-Driven Logistics Solutions

FactorFox, FactorEvo & Trucker Copilot partner with Farelanes to deliver real-time pricing, smarter routing & fraud detection to boost logistics efficiency.

WINTER GARDEN, FL, UNITED STATES, May 27, 2025 /EINPresswire.com/ -- [FactorFox](#) and its sister platforms [FactorEvo](#) and Trucker Copilot announce a strategic partnership with [Farelanes](#) LLC, the industry's premier provider of real-time freight lane pricing and analytics. This collaboration aims to deliver smarter routing, accurate lane-level pricing, and built-in fraud detection to factoring companies, carriers, brokers, and shippers across North America using our platforms.

FactorEvo Group and Farelanes LLC

"We're thrilled to partner with Farelanes to provide our clients with enhanced visibility and control over their supply chains," said Robert Vasquez, CEO at FactorFox. "Farelanes strengthens all three platforms so our users can make confident, cost-effective moves in real time."

> "Partnering with Farelanes allows us to take that commitment even further—bringing powerful pricing intelligence and fraud detection into the hands of our users, right when they need it most."
>
> *Robert Vasquez*

Farelanes delivers exact pricing pulled from paid invoices on over 37,000 primary lanes. Their proprietary data hygiene process ensures accuracy by eliminating duplicates and anomalies, providing users with clean, verified numbers.

With this integration:

• FactorFox users gain real-time lane pricing for risk underwriting and operational intelligence
• Factorevo clients automate approvals, funding triggers, and margin validation based on verified rates

• Trucker Copilot surfaces the best-paying lanes directly in the driver's mobile dashboard, giving carriers a faster path to profitability

Additionally, Farelanes' built-in fraud detection API adds an extra layer of security by flagging pricing anomalies and helping to mitigate risk. Best of all, the integration is designed to be seamless, allowing users to incorporate these powerful tools into their existing workflows without disruption.

"Knowing the actual price, not just an estimate, is a competitive advantage," said Neal Huffman, CEO and Co-founder of Farelanes. "Together with Robert's platforms, we are building a more intelligent and profitable logistics ecosystem."

Farelanes offers flexible, tiered subscription options for every user. The Silver plan gives carriers unlimited access to linehaul rates. The Gold plan delivers export-level detail, lead times, and fuel surcharges. Bulk Data Publishing provides real-time feeds in multiple formats for those needing full access at scale.

This partnership raises the bar on what is possible when routing intelligence meets operational scale. With our ecosystem of solutions, the future of transportation is informed, integrated, and always several steps ahead.

About FactorFox
Originally launched in 2002, FactorFox was the world's first cloud-native platform built specifically for factoring companies. Under Robert Vasquez's leadership, it became the category leader in web-based factoring software. After his successful exit in 2020, the platform changed hands, losing pace with innovation and market expectations. In 2025, Vasquez reacquired FactorFox to return it to its roots—with a next-generation vision and the infrastructure to lead once again.
