as a significant player in the global markets. This article delves into the growth from \$11.36 billion in 2024 to its expected leap to \$14.36 billion in 2025. With a promising compound annual growth rate CAGR of 26.5%, the market size has been on a rapid growth trajectory, making unprecedented strides in recent years.

How Big Is the Global [Intelligent Personal Assistants Market](#) Expected to Grow, and What Is Its Annual Growth Rate?

The uptrend in the Intelligent Personal Assistant market ascends back to the expanding importance of privacy and security in the digital economy. Increased adherence to privacy concerns coupled with the growing demand for voice-activated solutions and increased adoption of smart home devices has stimulated this skyrocketing expansion.

Key projections evaluate the Intelligent Personal Assistant market size to surge exponentially, growing to an estimable \$36.30 billion in 2029 at a CAGR of 26.1%. This growth sprouts from increased demand for automation, rising smartphone penetration, escalating dependence on

voice assistants, and the growing adoption of smart home technologies. In line with these trends, the forecast period holds lucrative prospects such as the integration of machine learning, AI in healthcare, expansion of AI voice assistance, AI voice system integrated vehicles, and most importantly, integration with IoT devices.

What Is Driving the Growth of the Intelligent Personal Assistants Market?

A surge in demand for efficiency and productivity hints at a promising future. Automation, which involves employing technology to accomplish tasks with minimal human intervention, sits at the helm of these drivers. By enabling swift, constant, and efficient task execution, automation is powering productivity and making strong inroads in various industries. Intelligent personal assistants find their strategic spot in automation by leveraging AI to execute tasks like scheduling, reminders, information retrieval, and device control, significantly trimming down the need for manual input.
