What are the Key Factors Driving the Leber Hereditary Optic Neuropathy Treatment Market?

The escalating incidence of glaucoma and optic neuritis is expected to influence the growth of the leber hereditary optic neuropathy treatment market favorably. Both glaucoma and optic neuritis are eye conditions which can cause damage to the optic nerve. Glaucoma is frequently caused by an increase in intraocular pressure, while optic neuritis can stem from inflammation often connected to autoimmune diseases, resulting in vision loss. The mounting incidences of glaucoma and optic neuritis are attributed to an aging population and improved diagnostic techniques.

Glaucoma and optic neuritis, similar to LHON, can cause optic nerve damage and vision loss. As the prevalence of these conditions grows, research attention is increasingly targeting therapies that address optic nerve degeneration and can directly benefit LHON treatment.
