CO, UNITED STATES, May 29, 2025

/EINPresswire.com/ -- In the new book

[Leadership Unscripted](#): Real, Raw, and Remarkable Journeys of Women Who Lead Boldly, executive coach and global strategist [Dawn Garibaldi](#) delivers a raw, insightful, and fiercely honest

account of leading through chaos, missteps, and high-stakes transformation. Her chapter, Turning Moments Into Impact: Resilient Leadership and Kick Ass Teams, brings readers behind the scenes of Fortune 50 boardrooms, factory floors, and the private battles no one talks about.

“

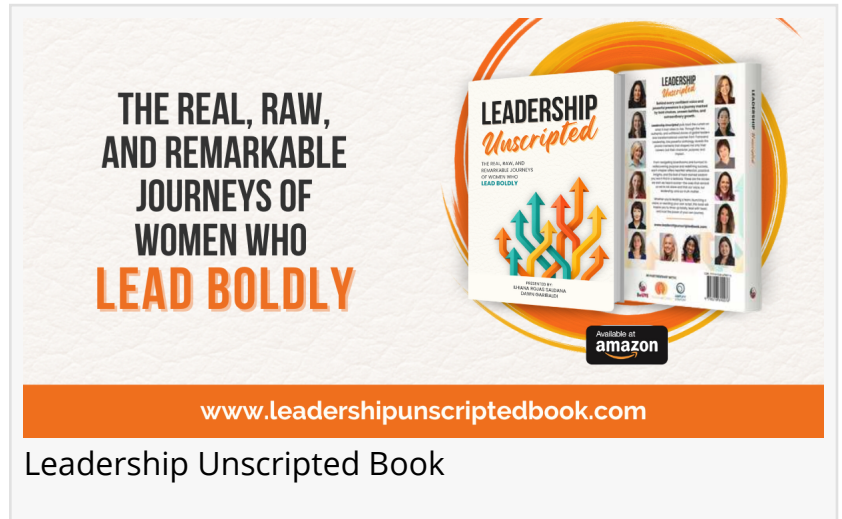

Resilience isn't the same as numbness. It means you go through challenges, you feel emotions, you experience failure and pain. You stumble, but you rise and bounce forward”

Dawn Garibaldi

Dawn's story begins with a pivotal moment—being blindsided by her team's growing discontent while leading a major global operation in Germany. What follows is a masterclass in humility, courage, and the power of micro-moments to build (or break) trust. From designing mainland China's first national supply chain to becoming Procter & Gamble's first female plant manager in Turkey and Germany, Dawn's journey is a testament to bold choices, deep reflection, and the lasting power of building empowered, interdependent teams.

“My biggest failures are what shaped me,” says Dawn. “Leadership isn't about being perfect—it's about presence, resilience, and owning your impact in every moment, big or small.”

Now based in Colorado, Dawn is the Founder and CEO of [Amplify Strategy Group](#), where she

coaches executives and teams around the world to lead with clarity, authenticity, and grit. Her work is informed by decades of global leadership, neuroscience-based coaching, and an unshakable belief that how we lead others begins with how we lead ourselves.

In her chapter, Dawn shares hard-won insights on how to create high-performing teams that thrive even when you're not in the room—and how to turn unexpected detours into defining leadership moments. Her voice is bold, generous, and practical, reminding us that transformation rarely follows a straight path—and that's where the real growth lives.
