Vasoactive Intestinal Peptide Market Report 2025 -
Market Size, Trends, And Global Forecast 2025-2034

What Is The Forecasted [Growth Of The Vasoactive Intestinal Peptide Market?](#)

The vasoactive intestinal peptide tumor global market has shown substantial growth in recent years. From a valuation of \$1.51 billion in 2024, it will rise to \$1.61 billion in 2025, reflecting a compound annual growth rate CAGR of 6.5%. This period of growth can be attributed to the increasing prevalence of VIP tumors, the intensified focus on research and development activities, increasing healthcare awareness, the expansion of healthcare infrastructure, and the prolific collaborations between biotech, pharma firms, and specialized research institutions.

Exploring Future Predictions For The Vasoactive Intestinal
Peptide Market?

The vasoactive intestinal peptide tumor market forecasts anticipate robust growth over the next few years. The market is projected to reach \$2.05 billion in 2029, growing at a CAGR of 6.3%. Market expansion during this projection period is likely to be driven by increasing demand for chemotherapy, faster drug approvals, heightened demand for oral drugs, increased disease awareness, and the growing prevalence of tumors.

The market's future trends are majorly influenced by advancements in targeted therapies, diagnostic techniques, treatment options, and personalized medicine. The emergence of innovative launches further propels the growth in the forecast period.

What Are The Primary Growth Drivers And Significant [Trends In The Vasoactive Intestinal Peptide Tumor Market](#)?

One of the key market growth drivers is the rise in the adoption of targeted therapies for treating VIP tumors. These therapies with a specific focus on molecules or pathways involved in disease progression, particularly cancer, selectively attack abnormal cells while sparing the healthy ones.

Also, the increased incidence of neuroendocrine tumors is anticipated to fuel the VIP tumor market's growth. Improved diagnostic techniques that facilitate early and accurate detection of these previously underdiagnosed tumors contribute to the increase in VIP tumor incidence.
