

# Global Uncomplicated Urinary Tract Infection Market Set For 6.8% Growth, Reaching \$14.27 Billion By 2029

*The Business Research Company's  
Uncomplicated Urinary Tract Infection  
Global Market Report 2025 – Market Size,  
Trends, And Global Forecast 2025-2034*

LONDON, GREATER LONDON, UNITED  
KINGDOM, May 29, 2025  
/EINPresswire.com/ -- The

uncomplicated urinary tract infection  
market has experienced considerable

growth in recent years. The market grew from \$10.24 billion in 2024 to \$10.98 billion in 2025, reflecting a robust compound annual growth rate CAGR of 7.2%. The historic period saw growth fueled by the rising incidences of renal failure and bladder cancer, an increase in chronic kidney diseases, and more extensive use of urinary catheters. The prevalence of diabetes also played a significant role in driving market growth.

Where Is The Uncomplicated Urinary Tract Infection Market  
Headed In The Future?

The market size of uncomplicated urinary tract infection treatments is slated for impressive growth in the coming years, with projections of the market reaching \$14.27 billion in 2029, registering a CAGR of 6.8%. This growth during the forecast period is expected to be driven by factors such as rising bacterial infections, an increasing aging population, and higher rates of urinary tract

infections. The increased use of contraceptives and a rise in sexual activity are other key contributory factors. Looking ahead, trends that will shape the market landscape include the development of telemedicine and telehealth solutions, advancements in therapeutics for UTI, and the development of novel drugs.

Uncomplicated Urinary Tract Infection Global Market  
Report 2025

## What's Fueling The [Uncomplicated Urinary Tract Infection Market Growth?](#)

In particular, the increasing incidence of chronic kidney diseases is expected to be a major driver of the uncomplicated urinary tract infection market. Chronic kidney disease, a long-term condition marked by the gradual loss of kidney function, leads to waste and fluid build-up in the body, leaving individuals more susceptible to urinary tract infections. These chronic ailments also result in a weaker immune system, which in turn contributes to an environment conducive to bacterial growth.

Interestingly, the rising cases of diabetes are also fueling market growth. Diabetes, a chronic disorder characterized by high blood sugar levels due to insufficient insulin production or ineffective insulin utilization, creates a favorable environment for bacterial growth in the urinary tract and thereby increases susceptibility to urinary tract infections.

## Which Companies Form The Backbone Of [The Uncomplicated Urinary Tract Infection Market?](#)

Multiple industry players are bolstering the uncomplicated urinary tract infection market. Prominent companies include Cardinal Health, Pfizer Inc., Bayer AG, AstraZeneca plc, GSK plc, Eli Lilly and Company, Siemens AG, Stryker Healthcare, John Hopkins Medicine, Shionogi & Co. Ltd., Sysmex Corporation, Bio-Rad Laboratories Inc, Cipla Inc., UTILITY therapeutics Ltd, Orchid Pharma Limited, ACON Labs, Sonika Lifesciences, Emergency Care BC, EB Medicine, and Iterum Therapeutics PLC.

## What Trends Are Emerging In The Uncomplicated Urinary Tract Infection Market?

These enterprises are innovating in antibiotic development to bolster treatment effectiveness and combat antibiotic-resistant bacteria. An example of such an innovation is the recent FDA approval of Pivya pivmecillinam tablets, intended for treating female adults with uncomplicated urinary tract infections resulting from susceptible bacteria.
