

CREE8 Achieves SOC 2 Type II Certification, Reinforcing Commitment to Secure, Cloud-Native Creative Workflows

CREE8 announced it has achieved SOC 2 Type II certification.

WEST HOLLYWOOD, CA, UNITED STATES, May 29, 2025

/EINPresswire.com/ -- CREE8, the cloud-native platform transforming creative production, announced it has achieved SOC 2 Type II certification, a rigorous third-party audit validating its commitment to enterprise-grade security, system reliability, and customer trust.

Founded with an IP-centric, security-first mindset, CREE8 was designed to meet the needs of modern creative teams who work on high-stakes projects across film, television, live sports, and gaming. The company's cloud-native platform eliminates physical infrastructure risks and offers creators secure, real-time access to high-performance production tools without sacrificing speed, flexibility, or control.

"Our customers' projects are based on valuable intellectual property," said Lisa M Watts, CEO and Founder of CREE8. "This milestone isn't just a technical achievement—it's proof of our continued investment in protecting their work with the highest standards of security and compliance."

SOC 2 Type II certification, developed by the American Institute of CPAs (AICPA), evaluates a company's controls over time across security, availability, and confidentiality. CREE8 passed this audit with zero exceptions and no history of security incidents—an especially meaningful

This milestone isn't just a technical achievement—it's proof of our continued investment in protecting [customers'] work with the highest standards of security and compliance."

Lisa Watts, CEO of CREE8

benchmark as cyberattacks in media production have been on the rise, with recent high-profile leaks impacting major studios and streaming platforms.

Highlights of CREE8's security posture include:

- End-to-End AES-256 Encryption for all files at rest and in transit
- Role-Based Access Controls and MFA, ensuring users only access the resources they need
- Zero Trust Architectural Stance, treating every connection and user as untrusted until verified

- Use of Only SOC 2-Certified Cloud Providers, including AWS and Google Cloud
- Founded with Security Policies & Governance in place from day 1
- Ongoing Penetration Testing and Audit Logs reviewed by independent assessors

CREE8 is an inaugural member of the [MovieLabs Industry Forum](#), has achieved TPN Blue certification, with TPN Gold audit in progress. As a fully virtual platform, it eliminates the physical vulnerabilities associated with legacy workflows—no lost hard drives or unsecured file transfers.
