

# Qualiphy Launches a Nationwide Virtual Good Faith Exam Platform for Medical Spas

BEVERLY HILLS, CA, UNITED STATES, June 25, 2025 /EINPresswire.com/ -- As the aesthetic and wellness industry experiences rapid growth, clinics are facing new compliance expectations tied to how medical oversight is delivered. To support providers with these changes, Qualiphy has launched a white-labeled, telehealth-based infrastructure delivering Good Faith Exams ([GFEs](#)) across all 50 U.S. states.

Qualiphy's platform automates the intake, compliance review, and provider assignment process, enabling real-time or asynchronous consultations depending on state regulations. Clinics can now remain fully compliant without added staffing or administrative burden.

At the center of these regulatory shifts is the [Good Faith Exam](#), now a non-negotiable step in delivering compliant care across many states.

## WHAT IS A GOOD FAITH EXAM?

A Good Faith Exam is a legally mandated medical evaluation, typically conducted by a physician (MD or DO), nurse practitioner (NP), or physician assistant (PA), before offering any prescription-based treatment or medical procedure.

Required to be performed these exams in states like Texas, Florida, California, and Arizona. Failure to do so can result in regulatory actions including license suspension and fines. Qualiphy ensures that every consultation, whether live or asynchronous, is compliant with both state law and the medical standard of care.

### Compliance & Regulatory Comparison Checklist: PSO via Qualiphy vs GFE-Only Providers

Regulatory & Operational Area	Qualiphy (PSO + GFE)	GFE Clearance Only
Initial Medical Evaluation (GFE)	✅ 50-state-compliant synchronous & asynchronous exams	✅ Often synchronous, may lack async compliance in all states
Follows Up With Patient Specific Order (PSO)	✅ Automatically issued after GFE	❌ Often missing or left to client/provider, risking fulfillment issues
Telehealth Mode Compliance	✅ Asynchronous & synchronous per state law	⚠️ May offer only one mode, creating legal gaps in some states
GFE Timing & Prescribing Protocol	✅ Always GFE first, PSO second	⚠️ May prescribe without clear PSO linkage or audit trail
Pharmacy Fulfillment Authorization	✅ PSO includes dosing, duration, formulation for compounded meds	❌ May lack PSO, violating state & pharmacy board rules
DEA & Board of Medicine Risk Exposure	✅ Full workflow auditability, no prescribing without exam	❌ Risk of "prescribing without examination" if only using GFE
Storage of PSO & GFE Documentation	✅ Auto-logged in EMR/portal, accessible for audits	⚠️ May not retain or centralize PSOs
Integrated Pharmacy Workflow	✅ Direct-to-pharmacy integration with patient-specific data	❌ Often requires manual pharmacy communication
GLP-1 Compliance Readiness (e.g., Semaglutide)	✅ GFE + PSO required, fulfilled with compounding pharmacy	❌ GFE alone not sufficient, fulfillment may be blocked or delayed
Automated Paper Trail for Legal Defense	✅ Timestamped records of GFE, PSO, prescriptions	❌ Lacks full trail—potential compliance red flag
State-by-State Legal Variation Handling	✅ Built-in rules for each state	❌ One-size-fits-all approach risks noncompliance
Scalability for Multi-State Clinics	✅ No need to hire in-state providers or build local infra	⚠️ Limits growth due to fragmented compliance approaches
Insurance & Malpractice Risk Reduction	✅ Standardized, defensible medical workflow	❌ Risk of medical board or pharmacy audit liabilities
Pricing Transparency & No Subscription	✅ Flat-rate per exam, white-labeled experience	⚠️ Hidden fees or limited flexibility

### Compliance & regulatory comparison checklist, PSO via Qualiphy vs GFE-Only Providers

As regulatory expectations continue to evolve, clinics must go beyond the initial evaluation alone.

#### FROM GOOD FAITH EXAM TO PATIENT-SPECIFIC ORDERS

Recent legal updates indicate that generic clearances are no longer sufficient. Many states now require Patient-Specific Orders (PSOs) that include exact medications, dosages, and provider delegation instructions. Qualiphy enables this transition by integrating custom workflows that align with clinical, legal, and pharmacy standards.

Yet despite these clear requirements, many clinics unknowingly fall short.

#### COMMON COMPLIANCE GAPS IN CLINICS

Qualiphy's clinical leadership has identified several recurring issues among medspas and IV therapy clinics:

- Absence of documented GFEs prior to treatment
- Delegation of patient assessments to unlicensed staff
- Use of outdated or one-time clearances for returning patients
- Lack of consistent documentation protocols for patient care

These gaps increase regulatory risk and can result in disciplinary action. Qualiphy helps mitigate that risk by building state-specific logic into every interaction on the platform.

Telehealth offers a scalable solution that not only addresses these gaps but also strengthens clinic infrastructure.

#### TELEHEALTH: A COMPLIANT PATH FORWARD

Qualiphy enables both synchronous (live video) and asynchronous (form-based) GFEs. With built-in HIPAA compliance and configurable workflows based on local laws, Qualiphy delivers secure, legally valid virtual evaluations that meet or exceed medical board expectations. All documentation, including prescription approvals and treatment notes, is tracked and accessible through the Qualiphy provider portal or integrated directly into the clinic's EMR.

Still, for clinics operating across multiple states, staying aligned with individual regulations remains a complex challenge.

#### NAVIGATING MULTI-STATE REGULATIONS

State-by-state variations in medical law pose a challenge to clinics scaling across regions.

For example:

- Texas and Georgia require live evaluations and PSOs
- California permits asynchronous evaluations under strict criteria

Qualiphy addresses this complexity by embedding state-specific compliance logic directly into its

telehealth workflow. As a result, each evaluation adheres to the correct protocol based on the patient's location and treatment category.

To further ease the burden on clinics, Qualiphy also eliminates the need for in-house provider management.

#### PROVIDER ACCESS, 7 DAYS A WEEK

Qualiphy's nationwide network of licensed providers is available 7 days a week from 6am to 7pm PST, including holidays. Clinics never need to manage physician staffing, licensing updates, or supervision logs. Qualiphy handles all provider matching, credentialing, and supervision as part of its end-to-end service.

#### PATIENT TESTIMONIAL

"Very professional, quick & to the point. From scheduling through completing my GFE - this service was simple & convenient." - ASHLEY H.

#### ABOUT QUALIPHY PC

Qualiphy PC provides fully branded, telehealth infrastructure for aesthetic and wellness clinics across the U.S. With over 2,500 five-star reviews, the platform supports providers with compliant GFEs, prescription routing, and pharmacy fulfillment.

Clinics looking to expand, retain patients, and reduce compliance risk can learn more or schedule a demo by visiting <https://qualiphy.me>.
