

# This Tennessee Nursery Is Quietly Fueling a National Pollinator Rescue Mission

*TN Nursery Joins TDOT's Mission to Save Monarchs with Sustainable Pollinator Plants*

NASHVILLE, TN, UNITED STATES, May 30, 2025 /EINPresswire.com/ -- Monarch butterflies are vanishing at an alarming rate. With habitat loss and pesticide use decimating pollinator populations across North America, urgent action is needed. In a bold conservation move, the Tennessee Department of Transportation (TDOT) has begun distributing free milkweed seeds to residents—an essential host plant for monarch caterpillars.

Monarch on a native plant bloom

At the heart of this movement is [TN Nursery](#), a family-owned native plant nursery dedicated to sustainability and biodiversity. Based in Tennessee, TN Nursery specializes in growing a wide selection of native, pollinator-friendly plants such as milkweed, coneflowers, bee balm, black-eyed Susans, liatris, and more. These species are vital for the survival of butterflies, bees, and other at-risk pollinators.

“

Save the planet, with one plant at a time”

*Tammy Sons*

“Our mission is rooted in giving back to the environment,”

says [Tammy Sons, owner of TN Nursery](#). “We’re proud to support initiatives like TDOT’s milkweed giveaway because pollinators are the unsung heroes of our food system. Without them, we’re in trouble.”

As a USDA-certified grower, TN Nursery provides responsibly cultivated bare-root plants with minimal environmental impact. The nursery also donates native plants to universities and conservation groups, promotes pollinator waystations, and educates gardeners on creating habitat-rich landscapes in their own backyards.

In a time when the monarch butterfly is flirting with extinction, the collaboration between state departments and sustainable growers like TN Nursery is a powerful example of how local action can spark national change. Customers across the country can join the movement by planting native, pesticide-free gardens—doing their part to help monarchs return.
