### What Is Driving The Growth Of The Zero Waste Packaging Market?

A primary driving force of the zero waste packaging market's burgeoning growth is the increasing demand for recyclable materials due to their pivotal role in reducing pollution. As waste is diverted away from landfills, we see reduced environmental contamination and preservation of natural resources. Zero-waste packaging facilitates the use of recyclable materials by encouraging the use of sustainable, reusable, or easily recyclable materials that diminish waste generation - crucial to maintaining resources within our circular economy. A report from the Department for Environment, Food & Rural Affairs in September 2024 highlights the U.K's recycling efforts, illustrating an increase from 62.4% in 2022 to 64.8% of its packaging waste being recycled in 2023.
