

# ASAP Semiconductor Outfits Just NSN Parts with Fixed-Wing Aircraft Solutions, Centering Efforts on Military Options

*To address rising requests for military-oriented, fixed-wing aircraft solutions, ASAP Semiconductor announces expanded offerings and website refinement efforts.*

ANAHEIM, CA, UNITED STATES, May 30, 2025 /EINPresswire.com/ -- ASAP

Semiconductor announced today an expansion of inventory offerings on its dedicated platform, Just NSN Parts, a purchasing resource that serves as a

gateway for customers seeking dependable sourcing solutions for [fixed-wing aircraft](#), rotary-wing aircraft, and marine parts. With demand steadily increasing across key defense sectors for military fixed-wing parts in particular, the distributor has moved to strategically enhance its range of NSN parts and components to address the most critical needs of its global customer

base. This expansion also encompasses an initiative to refine website catalogs, integrate new procurement tools, and deliver streamlined search experiences for users seeking essential items like fasteners, electronics, avionics, and aircraft assemblies for defense assets.

Today's aviation and defense procurement environment is shaped by a variety of shifting global dynamism, including rising military budgets and a broad push for modernization for legacy or aging systems. These moves are being made during a time of market uncertainty and supply chain healing, creating significant demand for

“

We remain focused on offering tailored solutions for fixed-wing aircraft and other critical military platforms, simplifying fulfillment processes in today's challenging markets.”

qualified parts that meet rigorous performance and industry standards. Fixed-wing aircraft in particular continue to play a central role in global military logistics and operations, making it necessary for many operators to have a reliable source for everything from simple nuts and bolts to high-performance electronics and weapons system support hardware. In response to

these conditions, ASAP Semiconductor is outfitting Just NSN Parts with [military aircraft parts](#) that are tagged with verified NSN data, enabling customers to execute procurement actions with greater confidence and efficiency.

The expansion of Just NSN Parts' offerings is heavily data-driven, with ASAP Semiconductor attesting that it is continuously analyzing industry trends, purchase orders, and partner requirements to determine which military aviation items and product families are most urgently needed. This approach has allowed the distributor to better forecast demand spikes and ensure that website inventory reflects current and emerging procurement requirements.

A significant portion of ASAP Semiconductor's initiative also involves enhancing the Just NSN Parts platform with features and listing resources. As new fixed-wing aircraft part numbers are added to the website, spontaneous changes will be made to bring new search features, cataloging systems, and data that will enable customers to narrow down needs quickly. These changes include the ability to conduct an [NSN lookup](#) for added components, as well as the ability to search for parts by CAGE Code, ATA chapters, FSC classifications, and more.

In addition to customer-facing tools, ASAP Semiconductor has also reaffirmed its commitment to carrying out internal investments to staff to reinforce fulfillment capabilities on the main platform and Just NSN Parts. This includes onboarding new personnel with experience in aerospace and military logistics, ensuring that customers on the website have access to account managers and support staff to facilitate fast and accurate requisition support.

"As customers continue to rely on dependable sourcing channels for critical military NSN parts and components, we are proud to expand Just NSN Parts to serve this demand," said Joe Faruqui, CEO of ASAP Semiconductor. "We remain focused on offering tailored solutions for fixed-wing aircraft and other critical military platforms, simplifying fulfillment processes in today's challenging markets."

Moving forward, ASAP Semiconductor will continue to improve website features and diversify stock to help customers in managing complex sourcing needs. As additional changes and developments are made in the coming months, ASAP Semiconductor will make further announcements. To keep up with the distributor and to view offerings, be sure to visit Just NSN Parts or ASAP Semiconductor today.

## About ASAP Semiconductor

ASAP Semiconductor is a parts distributor specializing in sourcing and delivering a diverse range of components for aerospace, defense, IT hardware, and industrial automation applications. Through purchasing platforms like Just NSN Parts, ASAP Semiconductor connects its customer base to a comprehensive inventory of high-quality aviation and marine items that are sourced from industry leaders.
