

Floyi and TopicalMap.com Launch Free SERP Similarity Chrome Extension for Instant Google SERP Overlap Analysis

Built on proven SEO workflows, the extension helps SEOs instantly compare Google results and visualize keyword overlap without copy-pasting.

NEW YORK, NY, UNITED STATES, June 2, 2025 /EINPresswire.com/ -- Floyi, in collaboration with TopicalMap.com, has launched the SERP Similarity Chrome Extension, a free browser tool that lets marketers, SEOs, and content strategists compare two Google search results side by side and instantly see which URLs appear in both.

A promotional graphic for the SERP Similarity Chrome Extension. It features a blue background with a white 'F' logo on the left. The text 'See SERP Overlap in Seconds' is prominently displayed. Below this, it says 'Compare two Google searches' and 'Find matching URLs instantly'. A yellow button with the text 'Add to Chrome - It's Free' is present. On the right, there is a visual representation of two overlapping search result pages with lines connecting matching URLs. The FLOYI logo is in the bottom right corner. Below the graphic, the text 'SERP Similarity Chrome Extension' is written.

FLOYI

SERP Similarity Chrome Extension

This tool is built directly from the workflows used by TopicalMap.com - known for creating in-depth [topical maps and SEO strategies](#) for hundreds of agencies and brands. With the rise of AI Overviews, AI Mode, and evolving SERP layouts, understanding how search results pages (SERPs) overlap has never been more important.

“

This started as a clustering tool for our own workflows. Now it gives every SEO and strategist instant clarity about what Google is really showing.”

Yoyao Hsueh

How It Works:

1. Click and Capture: Open the extension on any Google search to instantly collect the top organic results.
2. Compare Any Two Search Queries: Enter a second search term to pull its results in a background tab.
3. Visual Overlap: See both SERPs side by side, with overlapping URLs clearly highlighted and connected.

4. Save and Revisit: Use the “Show in Tab” option to preserve your comparison and return to it later.

The tool automatically cleans and matches URLs to ensure accurate comparisons, even when

formatting varies slightly. Visual lines between matched results make it easy to spot overlaps at a glance.

“This started as an internal tool to help us cluster keywords while building topical maps,” said Yoyao Hsueh, Founder of Floyi and TopicalMap.com. “Now it's available to everyone. If you're working with SERPs, this removes the grunt work and gives you clarity fast.”

What SEOs Can Do With It:

- Validate keyword clustering by checking SERP overlap in seconds
- Compare search intent across two queries without switching tabs
- Spot cannibalization risks before they hurt your rankings
- Save time during audits and topical map builds
- Work with clean, matched URLs that filter out fluff
- Stay accurate in an evolving SERP environment with AI Overviews and new features

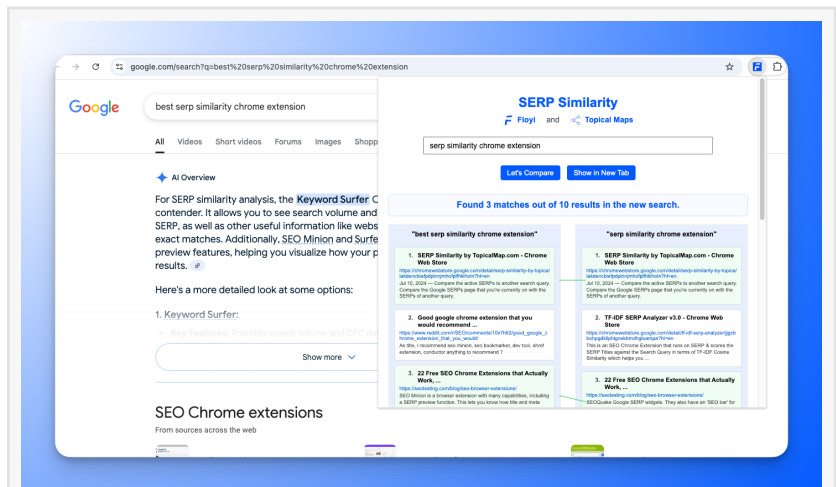

The SERP Similarity Chrome Extension is now available free to all users. Get it here: <https://floyi.com/serp-similarity-extension/>
