# ORIGYN Launches New Website Experience to Power the Future of Real-World Asset Certification

ORIGYN, the decentralized protocol for on-chain certification of RWA, is proud to announce the official launch of its newly redesigned website.

NEUCHâTEL, SWITZERLAND, June 3, 2025 /EINPresswire.com/ -- ORIGYN, the decentralized protocol for on-chain certification of real-world assets (RWAs), is proud to announce the official launch of its newly redesigned website: https://origyn.com.

ORIGYN, Where Real-World Assets Meet Blockchain

Screenshot of the website

The new platform offers an enhanced user experience, showcasing ORIGYN's growing ecosystem, technology capabilities, and commitment to accessibility and transparency in the RWA space.

> With the new ORIGYN website we wanted to offer clarity, the world of RWA and on-chain certification can feel complex, so the goal was to make it as intuitive and transparent as possible."
>
> *Karolina Głusek, President of the ORIGYN Foundation*

"With the new ORIGYN website, we wanted to create more than just a visual refresh — we wanted to offer clarity," said Karolina Głusek, President of the ORIGYN Foundation. "The world of real-world assets and on-chain certification can feel complex, so the goal was to make it as intuitive and transparent as possible. From exploring use cases to estimating certification costs, everything is now just a few clicks away."

Highlights of the New Website Experience:
1. Modern UX/UI Design - A clean, mobile-friendly interface focused on clarity, storytelling, and seamless navigation.
2. Use Case Explorer - Real-world examples of ORIGYN's impact across industries including fine art, luxury goods, gold, and identity.
3. Certification Cost Calculator - A powerful new tool enabling users to estimate the costs of

certifying and storing their assets on-chain.

4. Live Network Stats - Real-time metrics including certified assets, $OGY tokens staked, and TVL via DeFiLlama integration.

5. Updated Roadmap - A transparent view into ORIGYN's development pipeline, including new standards, partnerships, and ecosystem expansions.

ORIGYN's mission is to bring verifiable truth and ownership to the internet through decentralized certification of real-world assets. With the launch of the new website, ORIGYN invites builders, businesses, and creators to explore the protocol's capabilities and join the movement to shape a more secure and equitable digital economy.
