

My Visit Revolutionizes Field Management with Accurate Visit Tracker and EVV Tools

My Visit simplifies site visit tracking with real-time EVV technology for healthcare, field service, and workforce monitoring.

NEW YORK, NY, UNITED STATES, June 5, 2025 /EINPresswire.com/ -- In an increasingly mobile and compliance-driven world, My Visit (<https://myvisits.net/>) introduces a transformative solution for businesses and service providers that need to track field activity, manage mobile teams, and meet regulatory standards. The platform delivers an intuitive and secure visit tracker system integrated with [Electronic Visit Verification \(EVV\)](#), providing real-time visibility and verified documentation for every client visit or worksite task.

Whether managing a team of [home healthcare](#) providers, construction crews, inspectors, or mobile sales reps, organizations today face growing pressure to prove the accuracy and integrity of site visits. With increased government mandates and client demand for transparency, it's no longer enough to rely on outdated manual logs or trust-based systems. My Visit solves this challenge by offering a cloud-based, mobile-enabled site visit tracker that delivers accurate, time-stamped, and GPS-verified visit data.

"We built My Visit to meet the growing demand for accountability and regulatory compliance across industries," said a spokesperson for My Visit. "Our solution is designed to streamline operations while protecting organizations from fraud, compliance risks, and inefficiencies."

A Modern Visit Tracker for a Distributed Workforce

At the heart of My Visit is its advanced visit tracking system, which records when and where

employees perform services. Using mobile check-ins with real-time GPS logging, the platform creates an indisputable record of site visits that can be accessed from anywhere. Whether you manage one employee or hundreds, My Visit offers a centralized platform to oversee field operations, verify visits, and support both internal reporting and external compliance audits. Users can monitor field activity through a simple yet powerful dashboard that aggregates all location data into visual timelines and maps. Each entry includes essential metadata like check-in and check-out times, location coordinates, duration, and staff identification, ensuring every visit is traceable, verified, and secure.

Electronic Visit Verification (EVV) That Meets Government Requirements

As EVV requirements continue to expand across Medicaid-funded services in the U.S., My Visit provides a turnkey solution for agencies to meet compliance with ease. The platform collects all key elements mandated by EVV legislation, including:

- The type of service performed
- The individual receiving the service
- Date and location of service
- Provider details
- Precise time of arrival and departure

This EVV compliance is critical for home healthcare agencies and personal care providers, as failure to implement a certified solution can result in payment denials, fines, or loss of Medicaid eligibility.

“We understand that EVV compliance can be a burden for many agencies,” said the spokesperson. “That’s why we designed My Visit to automate and simplify every step of the process.”

Powerful Features to Improve Field Operations

My Visit is more than just a site visit tracker. It’s a complete visit management tool equipped with the following key features:

[Real-Time GPS Tracking](#): View employee movements and visits live or through historical playback for accurate audits and service validation.

Custom Visit Logs: Capture custom fields like service notes, photos, signatures, or forms during check-in and check-out to match your business processes.

Automated Reports: Export visit records, performance summaries, and compliance logs in just a few clicks—ideal for client updates or regulatory inspections.

Cloud Access and Mobile App: Staff can check in via the mobile app, while managers review visit data on desktop or mobile devices from anywhere.

Secure Data Storage: All visit data is encrypted, securely stored in the cloud, and accessible only by authorized users.

User-Friendly Interface: Built for easy onboarding and everyday use by staff at all technical levels.

Industries That Benefit from My Visit

My Visit is tailored for a wide range of sectors, including:

Home Healthcare & Personal Care Services

Construction & Facility Management

Real Estate & Property Inspections

Field Sales & Mobile Teams

Government & Nonprofit Field Services

By consolidating visit data in one place and automating verification, businesses reduce paperwork, prevent missed visits, and ensure better service accountability.
