

Censinet Recognized in the 2025 Gartner® Market Guide for Third-Party Risk Management Technology Solutions

BOSTON, MA, UNITED STATES, June 3, 2025 /EINPresswire.com/ -- [Censinet](#), the leading provider of healthcare risk management solutions, today announced it has been recognized as a Representative Vendor in the 2025 Gartner® Market Guide for Third-Party Risk Management Technology Solutions. According to Gartner: “legal, compliance, risk and procurement leaders

“

As cyber threats and compliance complexity intensify across the healthcare ecosystem solutions like Censinet RiskOps are essential to protecting patient safety and strengthening enterprise resilience.”

Ed Gaudet, CEO and Founder of Censinet

can use this research to identify technology solutions and risk domains for managing and mitigating third-party risk. TPRM platforms offer versatile capabilities that support supply chain, IT, cybersecurity, procurement, legal and compliance functions.”

“We believe Censinet’s inclusion in the 2025 Gartner Market Guide for TPRM validates the Company’s differentiated focus on healthcare and our commitment to helping organizations assess, manage, and mitigate risk in alignment with security best practices and healthcare regulations—delivering meaningful results with unparalleled speed and effectiveness,” said Ed Gaudet, CEO and Founder of Censinet. “As cyber threats and

compliance complexity intensify across the healthcare ecosystem, purpose-built solutions like Censinet RiskOps are essential to protecting patient safety and strengthening long-term enterprise resilience.”

Censinet Delivers on Gartner’s Market Recommendations

The 2025 Gartner Market Guide outlines key recommendations for selecting and scaling a successful third-party risk management program. We believe Censinet RiskOps™ aligns strongly with these recommendations, enabling healthcare organizations to meet current TPRM demands and prepare for future complexity:

End-to-end lifecycle coverage: Censinet RiskOps supports the full TPRM lifecycle—from rapid onboarding and evidence collection to CAPs, remediation, continuous monitoring, reporting, reassessments, and offboarding. The platform enables seamless collaboration across IT,

cybersecurity, compliance, legal, procurement, and clinical teams to ensure complete risk visibility and accountability.

Adaptability and scalability: Purpose-built for healthcare, Censinet RiskOps helps organizations scale third-party risk management across evolving and expanding third-party ecosystems—keeping TPRM continuously aligned with emerging risks and regulations. Its modular architecture and AI-driven automation enable rapid program growth without added staff, high costs, or long implementation cycles.

Defined, “must-have” capabilities out of the box: Censinet delivers all critical capabilities outlined in the Market Guide—a true “TPRM program in a box”—including third- and fourth-party risk management, continuous monitoring, workflow automation, collaboration, and dynamic reporting, all without the configuration burdens of traditional GRC tools.

Flexible deployment and integration: Censinet enables fast, streamlined deployment through modern APIs for rapid integration with existing IT, GRC, and procurement systems. The platform accelerates time to value by avoiding lengthy configuration delays, helping minimize total cost of ownership and enabling healthcare organizations to expand risk programs efficiently and cost-effectively.

To us, Censinet’s inclusion in the Gartner Market Guide reinforces its leadership in delivering a healthcare-specific TPRM platform that combines automation, scalability, and cross-functional collaboration—we believe exactly as recommended by Gartner for building resilient, efficient risk management programs.
