

FS-Elliott Expands Manufacturing & Service Programs to Maximize Customer Uptime

Accelerated Repairs, On-Demand Storage, and Smarter Manufacturing to Keep Operations Running

EXPORT, PA, UNITED STATES, June 11, 2025 /EINPresswire.com/ -- FS-Elliott, a leading manufacturer of [centrifugal air and gas compressors](#), announces a series of strategic investments to enhance operational efficiency and elevate customer support. These initiatives include the launch of the [Rapid Response Service Center and Rapid Response Storage Center](#), along with significant upgrades to the manufacturing facility, all designed to minimize customer downtime, enhance service flexibility, and reinforce the company's commitment to sustainability.

Investing in Advanced Manufacturing Technology

As part of its ongoing commitment to continuous improvement, FS-Elliott has invested in additional advanced machinery, including a state-of-the-art grinder and an upgraded 5-axis machining center. The new grinder streamlines production processes, allowing FS-Elliott to respond more quickly to customer needs without compromising quality. Meanwhile, the upgraded 5-axis machining center enhances throughput and broadens machining capabilities, offering customers greater flexibility, improved service options, and reduced customer lead times. These investments further strengthen the FS-Elliott's ability to deliver high-performance solutions with the efficiency and reliability customers expect.

turnaround times and enhanced customer support. The center specializes in air end reusability and supports the company's Environmental, Social, and Governance (ESG) initiatives. It provides air end overhauls, re-ratings, and remanufacturing services in a dedicated teardown, inspection, and assembly space. With a comprehensive inventory in place, the center enables faster service, shorter lead times, and reduced customer downtime.

"Downtime is expensive for our customers, both in time and resources. With our new service center, we're able to respond faster and more efficiently, helping to minimize disruptions while advancing our commitment to sustainability in manufacturing and service," said Albert Gomez, Vice President of Global Services at FS-Elliott.

Rapid Response Storage Center: Ready When You Need It

Complementing the service center, FS-Elliott has also launched the Rapid Response Storage Center, which provides environmentally controlled storage for new and refurbished air ends and other essential components. This program is ideal for customers who need access to critical parts. For air end storage, the program includes routine maintenance, mechanical testing, and a 12-month warranty upon shipment. With dispatch times often within 24 hours, the program minimizes operational disruption, particularly for customers who cannot afford extended downtime. "The Rapid Response Storage Center offers customers peace of mind, ensuring their equipment is ready when needed," said Gomez. "It's an industry-first solution that helps our customers plan ahead and maximize uptime."

About FS-Elliott Co., LLC

FS-Elliott is a global leader in the engineering and manufacturing of oil-free centrifugal compressors, with operations in over 90 countries. For 60 years, FS-Elliott has combined a commitment to quality with advanced technology, enabling customers to increase productivity and lower system operating costs.
