Sooner or later you'll encounter a medical emergency in your practice. We will discuss the most common medical emergency events in dental practice settings, and the protocols on how to deal with them."

Dr. Vladimir Polyakov

- Allergic Reactions
- Asthmatic Episodes
- Seizures
- Anginal Pain

ABOUT THE HOST & SPEAKER:

Dr. Vladimir Polyakov, DDS Oral Surgeon

Dr. Vladimir Polyakov received his undergraduate degree in Biology from UCLA, went on to graduate from the UCLA School of Dentistry, and then completed his Oral and Maxillofacial Surgery residency at UCLA Medical Center, making him a UCLA Bruin x 3!

Dr. Polyakov has been practicing Oral and Maxillofacial Surgery since 1993 and consistently notices a very important fact about people who are facing a procedure: Patients that are well informed about their condition, and actively involved in planning treatment, make better choices, have an easier recovery, and achieve better postoperative results.

This happens most when everyone is working together as a team. The referring dentist who knows when to act, the oral surgeon who understands the latest advances, and their staff, compiling relevant information to help patients make the best (and happiest) choices.

That is why Dr Polyakov established Synergy Dental Implant and Oral Surgery Center. He aims to provide the perfect combination of precision, care, and technology to give Synergy's patients the best oral health possible.
