

# Pacific Proworks Inc. Expands New Home Construction Services Across Los Angeles

*In response to growing demand, Pacific Proworks Inc. announces expanded services for custom new home construction projects across the Los Angeles region.*

CULVER CITY, CA, UNITED STATES, July 1, 2025 /EINPresswire.com/ -- Pacific Proworks Inc., a licensed general contractor based in Los Angeles, has announced the expansion of its [custom new home construction](#) services to meet rising demand from homeowners and property developers in Southern California.

The company, which has built a reputation for ADU development and residential remodeling, is now offering end-to-end new build services — including lot prep, design collaboration, permit handling, foundation, framing, finish work, and final inspections.

Pacific Proworks Inc. specializes in ADUs, new home builds, and full-service remodeling projects across Los Angeles.

“We’ve seen increased interest in ground-up construction from clients who want homes tailored to their lifestyle, energy needs, and long-term goals,” said Denette Rael, founder of Pacific Proworks Inc.

The demand for new home builds in Los Angeles County has grown steadily in recent years, driven by changing family needs, urban infill opportunities, and a limited inventory of move-in-ready homes. Pacific Proworks Inc. is expanding its capacity to serve both individual homeowners and investors seeking to build on empty lots or tear-down properties.

## Comprehensive New Build Services

The company's services include:

- Site prep and grading
- Permit-ready plan support
- Framing, roofing, plumbing, electrical
- Modern finishes and energy-efficient designs
- Coordination with architects and city inspectors

Rael noted that clients often face delays and design challenges when dealing with multiple subcontractors — Pacific Proworks aims to simplify the process by managing the entire build from start to finish.
