”

The Business Research Company

What Are The Projections For The Self-Service Technologies Market?

It is projected that the self-service technologies market will experience rapid growth in the years to come, registering a compound annual growth rate CAGR of 12.4% to reach a value of \$67.37 billion in 2029. This forward-looking growth is attributable to factors such as globalization and standardization, environmental concerns driving sustainability, expansion into new industries, stringent regulatory compliance, and advanced security measures

that ensure customer safety. The forecast period will also witness major trends like remote and AI-powered support, contactless solutions, mobile integration, AI-led automation, and omnichannel experiences that enhance the user experience.

What Is Driving The Self-Service Technologies Market?

One of the primary growth drivers in the market is the surge in demand for self-service machines and automated devices. Self-service kiosks, essentially touchscreen computers or interactive tablets, allow customers to access information or services without interacting with a live person. The increasing adoption of these machines by service-based industries to reduce human resources, retain existing business, and ensure customer satisfaction has resulted in an upswing in global demand for self-service machines and automated devices.

Who Are The Leading Players In The Self-Service Technologies Market?

Some of the notable players operating in the self-service technologies market include KIOSK Information Systems Inc., NCR Corporation, HESS Cash Systems GmbH & Co KG, Fujitsu Limited, Glory Global Solutions Limited, Zebra Technologies Corporation, Advanced Kiosks, and Protouch Manufacturing Ltd.
