

# ProSat Networks Expands Starlink Installation Services in Louisiana

*ProSat Networks 1-844-799-0258 offers Starlink installation in Louisiana for businesses, homeowners, RV Parks & Starlink maritime for boats.*

LAFAYETTE, LA, UNITED STATES, June 27, 2025 /EINPresswire.com/ -- [ProSat Networks](#), a professional Starlink installation and onsite IT support services company for commercial businesses, residential homeowners, RV parks and maritime ships, following the Q1-2025 acquisition of Pro Starlink Installers has officially announced their expansion of [Starlink installation services](#) throughout Louisiana (LA), USA.

ProSat Networks Starlink Installation in Louisiana

“

Starlink high-speed low-latency broadband internet is a game changer for many New Mexican individuals, businesses and entire communities.”

*spokesperson from ProSat Networks*

"Louisiana residents, businesses and government agencies are embracing the future of connectivity with Starlink. Whether it's supporting remote homes in the Bayou region, oil and gas operations in the Gulf, fishing vessels along the coast, or RV parks & RV resorts wishing to offer better internet services to their guests and residents, demand for professional Starlink installation is growing rapidly across the Pelican State," stated a spokesperson from ProSat Networks.

According to recent reports from the Louisiana Public Service Commission (LPSC) and the Louisiana Office of Broadband Development and Connectivity, hundreds of thousands of Louisianans, especially in remote rural parishes, coastal communities, and areas affected by frequent storm damage, still lack access to reliable high-speed internet. From the marshlands of South Louisiana to the pine forests of North Louisiana and isolated communities throughout Acadiana, traditional fiber-optic infrastructure often fails to reach the Cajun state's most underserved areas. Starlink LEO (low-Earth-orbit) satellite broadband internet is now readily available to help bridge New Mexico's digital gap being called the digital divide.

Unlike traditional internet service providers (ISPs) that rely on costly fiber-optic cable, Starlink delivers low-latency, high-speed broadband internet directly from LEO satellites orbiting

approximately 250 miles above the Earth's surface vs. traditional GEO (geostationary) satellites that orbit at approximately 23,000 miles. This allows urban, suburban and rural businesses, homes, airports, farms, schools, hospitals, clinics, RV parks, campgrounds, hotels, resorts, reservations, mobile operations, government and military agencies, and even in marinas and on boats along the Gulf Coast and inland to stay connected with reliable, high-speed broadband internet.

To meet the growing demand, ProSat Networks now offers professional Starlink installation services in Louisiana for:

#### 1. FIXED LOCATIONS

Louisiana Commercial Businesses – Enterprise-grade [Starlink business installation](#) & IT integrations as the primary or backup ISP for business-class IT networks, including oil and gas operations, seafood processing facilities, and tourism businesses.

Louisiana Residential Homes – Reliable high-speed internet is now accessible for remote work, healthcare, e-learning, gaming, streaming—residential rooftop installation in urban and rural Louisiana parishes.

Internet Communities in Louisiana (wired & wireless) – High-performance commercial-grade Starlink installations within a defined community where only members are granted user access to the Starlink network. Internet communities may be organized by any hard-wired structures such as data-cabled apartment buildings, condos and commercial buildings, or wirelessly by household (neighbors living within a certain proximity of each other), HOAs, RV parks, campgrounds, hotels, motels, resorts, retreat communities, marinas and more. In an internet community, users or household groups have their own defined levels of access and data usage
