Addressing the Legacy Reporting Crisis

Organizations worldwide are grappling with many issues including increasingly obsolete reporting technologies, change in licensing conditions, no active support post M&A etc. Customers are looking for alternatives to Microsoft SSRS, crystal reports, Jasper reports, Oracle reports and Pentaho reports. These legacy platforms present significant challenges:

• Outdated Technology Stacks: Built on aging architectures incompatible with modern cloud environments
• Escalating Licensing Costs: Restrictive pricing models that penalize growth and scalability
• Limited Support: Reduced vendor investment in legacy product lines
• Security Vulnerabilities: Older platforms lack modern security frameworks
• Integration Challenges: Poor compatibility with contemporary data sources and APIs

Core Reporting Features:

• Pixel-Perfect Precision: Generate bank statements, salary slips, invoices, and regulatory reports with exact formatting control
• Advanced Pagination: Sophisticated page breaks, images, headers, footers, and multi-page document handling
• Dynamic Data Integration: Connect seamlessly to SQL databases, REST APIs, cloud data warehouses, and modern data lakes
• Professional Output Formats: Export to PDF, Excel, CSV, ODT, and print-ready formats
• Row-Level Security: User-based data access controls for sensitive financial and HR reports
• Embedding: Embed these reports into your product

Comprehensive BI Platform Beyond Legacy Limitations

Unlike single-purpose legacy reporting tools, Helical Insight 6.0 provides a complete business intelligence ecosystem:

Modern Dashboard Capabilities:

• Interactive dashboards with drill-down and drill-through functionality comparable to Tableau, Power BI, and QuickSight
• Real-time data visualization and self-service analytics
• Mobile-responsive design for modern workplace requirements
• Embedding and white labelling options for product based companie's

Technical Excellence:

• Latest Java and Tomcat Integration: Enhanced performance, security, and scalability
• Cloud-Native Architecture: Deploy on AWS, Azure, Google Cloud, or on-premises
• Open-Source Flexibility
