

# CapLinked Highlights EZ Q&A Tool to Accelerate Due-Diligence Question Routing

*CapLinked's EZ QA tool, built into its VDR, automates the flow of buyer questions, assigns them to the right subject-matter experts, & tracks every answer.*

LOS ANGELES, CA, UNITED STATES, June 4, 2025 /EINPresswire.com/ -- [CapLinked](#), the secure virtual data-room provider trusted by private-equity firms, venture investors, and corporate development teams, today spotlighted its [EZ Q&A](#) capability—an in-platform workflow that streamlines how buyers submit questions and how sellers route answers during high-stakes transactions.

“The Q&A period often stalls otherwise-ready deals,” said Greg Brinson, CapLinked’s CEO and co-founder. “EZ Q&A removes that bottleneck by automating assignments, preserving a full audit trail, and keeping sensitive exchanges inside the VDR instead of scattered across email threads.”

How EZ Q&A speeds the deal clock

**Automated Question Assignments** – Administrators direct each incoming question to the right subject-matter expert with a single click.

**Permission-Aware Collaboration** – Members only see Q&A threads allowed by their group’s permissions, keeping privileged information compartmentalized.

**Real-Time Alerts & Dashboards** – Both askers and answerers receive instant notifications and status updates, avoiding lag.

**FAQ Publishing** – Frequently asked questions can be promoted to a public FAQ section so future buyers find answers without extra emails.

**Exportable Audit Trail** – A complete log of every question, response, and timestamp is exportable for compliance or post-merger review.

By housing every inquiry inside the same encrypted VDR that stores deal documents, EZ Q&A helps sell-side teams keep negotiations on schedule while retaining full control over sensitive information.

## Availability

EZ Q&A is included in all CapLinked Enterprise plans and can be activated in new or existing workspaces within minutes. To learn more—or to schedule a demo—visit [caplinked.com/ez-qa/](https://caplinked.com/ez-qa/).

## About CapLinked

Founded in 2010, CapLinked provides secure virtual data rooms and information-control software for mergers & acquisitions, fundraising, asset sales, and other complex projects. The platform combines enterprise-grade security, intuitive workflows, and concierge-level onboarding to help clients worldwide protect and exchange critical documents with confidence.
