

Synchrocure Launches Franchise Program in Tennessee, Opening New Doors for Healthcare Entrepreneurs

Empowering Business Owners to Deliver Innovation in a Rapidly Growing Medical Device Market

TN, UNITED STATES, June 24, 2025
/EINPresswire.com/ -- [Synchrocure, LLC](#), a leader in medical device

distribution, has officially launched its new franchising program across multiple U.S. states - marking a pivotal step in the company's mission to make healthcare innovation more accessible while creating meaningful business opportunities for driven entrepreneurs.

“

We're helping entrepreneurs step into a space that has the potential for long-term rewards, while contributing to better care for patients and communities across the country”

Reza Yazdian, J.D.

With this new program, Synchrocure is inviting professionals, sales specialists, and aspiring business owners to enter one of the fastest-growing sectors of the U.S. economy: the \$500 billion medical device market, projected to exceed \$650 billion by 2032. The franchising initiative offers a structured entry point into this dynamic industry, without the complexity typically associated with launching a healthcare-related business.

“This program was built for those who want to make an impact in healthcare and take ownership of their professional journey,” said Reza Yazdian, J.D., Principal Managing Partner of Synchrocure. “We’ve taken nearly 30 years of industry experience and packaged it into a franchise model that lowers the barrier to entry while maximizing support and scalability.”

Synchrocure franchisees gain immediate access to a curated portfolio of proven, in-demand medical technologies sourced from leading global manufacturers. Unlike traditional sales operations, franchisees operate with the full backing of Synchrocure's infrastructure - benefiting from product sourcing, logistics, training, compliance, and back-office support.

From day one, franchise partners are equipped with:

- A comprehensive product catalog spanning spine, orthopedic, biologic, and surgical solutions
- On-demand and self-paced training on medical technology, anatomy, and B2B sales strategy
- Personalized business development coaching
- Streamlined operations and customer relationship support

The program is designed not just to distribute products, but to build lasting partnerships with healthcare providers and institutions that value quality, reliability, and innovation.

With its multi-state launch, Synchrocare is identifying franchisees who share a passion for healthcare, service, and entrepreneurship. The company is especially focused on regions with strong healthcare infrastructure and business-friendly environments, including Tennessee, where early interest has been strong.

Synchrocare's franchise program empowers entrepreneurs with access to innovative medical devices, multiple revenue streams, and comprehensive support.

Entrepreneurs looking to launch a purpose-driven and resilient business in a high-impact industry now have a compelling path forward. With Synchrocare's franchise program, the opportunity to shape the future of healthcare is real ... and it starts today.

About Synchrocare, LLC
