

# Chckvet Secures Pre-Seed Funding - Rolls out Enhancements to Address Industry Pain Point of New Client Acquisition

BATON ROUGE, LA, UNITED STATES, June 5, 2025 /EINPresswire.com/ -- Chckvet, a fully integrated online scheduling, client communication, and analytics software for veterinary clinics, announces a successful Pre-Seed round. According to Elliott Greenwood, co-founder of Chckvet, "this is an important milestone for the company as this raise will allow us to focus on growth and infrastructure expansion. The data is clear: veterinary practices continue to face significant challenges in maintaining client visits. Patient visits and active patient counts continue to decline while lapsing patient counts continue to grow, signaling a need for immediate and strategic action. All veterinary practices now need an instant booking solution to drive new client acquisition, help with client retention, and improve team efficiency.

According to Team Lead, Tiffany G., at Belton Veterinary Clinic in Belton, Texas, "Chckvet makes scheduling an appointment online fast and easy. At the end of the day, all of our client communication is saved into each patient's file without having to copy and paste every conversation."

Additionally, the Pre-Seed funds enabled Chckvet to scale its practice analytics to the enterprise level and further develop its industry-first Daily Huddle. Dr. Nicole Johnson, President of the Illinois State Veterinary Medical Association and owner of Pekin Animal Hospital in Pekin, IL, says, "As the practice owner, I really appreciate the analytics and the Daily Huddle (one of my favorite aspects of the Dashboard) to have a good snapshot of how my practice is performing and where we can improve."

Chckvet continues to lead the industry in helping veterinary practices automate and streamline day-to-day business operations, allowing them to spend more time doing what they actually want to be doing - helping more pets.
