

# Harmochen Opens New Showroom in West Hollywood, Expanding Access to Premium Custom Cabinetry Across Los Angeles

*Harmochen opens a new West Hollywood showroom to showcase premium custom cabinetry and closet designs, expanding service across Los Angeles County.*

WEST HOLLYWOOD, CA, UNITED STATES, June 5, 2025

/EINPresswire.com/ -- Harmochen, a leading [cabinet maker in Los Angeles](#) County, announces the grand opening of its flagship showroom in West Hollywood. Specializing in Custom Cabinetry and Custom Closet solutions, the company aims to make its high-quality, design-driven products more accessible to homeowners, interior designers, and contractors throughout the region.

The opening of the West Hollywood showroom marks a major milestone for Harmochen, which has become known for crafting refined Custom Cabinets that merge architectural precision with functional innovation. Strategically situated in the heart of one of Los Angeles County's most design-forward neighborhoods, the new showroom will offer clients a tangible experience of Harmochen's craftsmanship and design capabilities. With demand for [Custom Cabinetry in Los Angeles](#) growing steadily, the company identified the need for a dedicated space where prospective clients can explore materials, view design mockups, and consult directly with expert designers.

Harmochen in Los Angeles

Custom Cabinetry in Los Angeles

“The showroom gives our clients an opportunity to interact with our products in a meaningful way,” said Babak Akbarnavaz, Head of Design at Harmochen. “Whether someone is looking for [Custom Cabinetry in West Hollywood](#) or a complete custom closet installation in another part of Los Angeles, we wanted to create a space where ideas could be translated into reality through conversation and collaboration.”

Cabinet Maker in Los Angeles

Harmochen has served as a trusted cabinet maker in Los Angeles for years, designing and building Custom Cabinets and closets that reflect individual needs while complementing diverse architectural styles. With West Hollywood’s design-conscious clientele and the broader county’s growing interest in custom home upgrades, the new showroom will act as both a creative hub and logistical anchor point for expanded service delivery.

The West Hollywood showroom will feature full-scale cabinet and closet displays, a library of wood and finish samples, integrated lighting demonstrations, and digital visualization tools that allow clients to view layout options and design schemes in real time. This immersive environment is intended to assist clients in making informed choices about everything from layout and storage configuration to finishes and hardware. All consultation services will be provided on-site by trained design staff with experience in both residential and commercial projects across Los Angeles.

As home renovation and interior design projects continue to rise across the region, Harmochen is responding to client demand with tailored solutions in Custom Cabinetry and Custom Closet design. The company is known for blending high-quality materials with tailored craftsmanship, offering cabinetry that not only meets functional requirements but also enhances interior aesthetics. Each product is custom-built at the company’s Southern California facility and installed by skilled technicians.

Clients across Los Angeles, including Beverly Hills, Pasadena, Santa Monica, and Glendale, have turned to Harmochen for projects ranging from full kitchen redesigns to bespoke storage solutions for compact urban spaces. Whether it’s optimizing space in a Hollywood Hills home or designing a Custom Closet in a downtown loft, Harmochen’s team applies the same rigorous attention to design detail, functionality, and construction standards.

“Our presence in West Hollywood is not just about serving one neighborhood,” Babak

Akbarnavaz explained. “We view this as a launch point to better serve the entire Los Angeles region. People are looking for cabinetry that reflects their personality and fits seamlessly into their space—something off-the-shelf options simply can’t offer.”

Harmochen’s design philosophy is rooted in customization and client engagement. Every project begins with a personal design consultation that evaluates the client’s goals, space parameters, and style preferences. From there, the company provides a full-service experience, including conceptual design, material selection, fabrication, and installation. Whether clients need Custom Cabinetry for a kitchen, bathroom, or utility space, or seek high-end Custom Closets with built-in lighting and modular shelving, Harmochen ensures each component aligns with the client’s needs.

As part of the expansion, the company is also introducing a new line of eco-conscious finishes that reflect West Hollywood’s environmentally progressive values. The showroom will feature these sustainable materials and provide information about sourcing and long-term durability. With increasing interest in sustainable home design across Los Angeles, Harmochen has committed to offering responsibly sourced woods and low-emission finishes as standard options for all new projects.

The West Hollywood showroom opening reflects the company’s growing influence in the Custom Cabinetry industry. In addition to serving residential clients, Harmochen has also begun collaborating with local builders and architects who require reliable cabinet makers in Los Angeles for new construction and multi-unit developments. These partnerships are built on a foundation of design transparency, production reliability, and a mutual commitment to elevating the built environment.

With the new location, Harmochen is also investing in technology to streamline design approvals and project timelines. Clients will have access to 3D rendering tools that can be used both in the showroom and remotely. These tools allow homeowners and designers alike to visualize how Custom Cabinets or Custom Closets will appear within their existing space before fabrication begins. The technology will also support accurate quoting and reduce the likelihood of design revisions mid-project.

The decision to establish a brick-and-mortar presence at 8687 Melrose Ave was influenced by West Hollywood’s reputation as a cultural and design capital. The area’s mix of contemporary condos, historic residences, and boutique commercial spaces offers fertile ground for custom storage solutions that must balance form and function. Harmochen plans to make the showroom a long-term fixture in its client engagement strategy, offering seasonal design previews, educational workshops, and exclusive consultations with guest designers.

As Custom Cabinetry becomes an increasingly personalized and design-forward discipline, Harmochen aims to lead the way in West Hollywood and throughout the greater Los Angeles area. The company’s focus on detailed craftsmanship, client collaboration, and innovative

technology continues to set it apart from mass-market competitors. From luxurious Custom Closets to high-efficiency kitchen cabinets, Harmochen remains committed to creating lasting value for clients who prioritize quality, functionality, and aesthetics.

The showroom is now open to the public by appointment, with walk-in hours available later this summer. Interested clients, designers, or media professionals are invited to schedule a consultation to explore Harmochen's product offerings and discuss project needs.
