This innovative treatment option marks a significant advancement in orthodontic care, providing teens and adults with an effective way to achieve beautiful, confident smiles without the hassle of metal brackets and wires. <https://orthodontistcostamesaca.com/> has all invisalign services for a healthy smile.

Invisalign

Revolutionizing Orthodontic Care with Invisalign

“

Our goal at Bekmezian Orthodontics is to provide the most advanced and patient-friendly orthodontic solutions available.”

Dr. Sona Bekmezian,

Invisalign has transformed the orthodontic landscape by introducing clear, removable aligners that gradually straighten teeth with precision and convenience. Unlike traditional braces, Invisalign aligners are virtually invisible, allowing patients to maintain their natural appearance throughout treatment. Bekmezian Orthodontics is excited to bring this next-generation technology to the Costa Mesa community, enhancing patient comfort and satisfaction.

“Our goal at Bekmezian Orthodontics is to provide the most advanced and patient-friendly

orthodontic solutions available,” said Dr. Sona Bekmezian, lead orthodontist at Bekmezian Orthodontics. “Invisalign allows us to offer a discreet and flexible treatment option that fits seamlessly into our patients’ busy lifestyles, without compromising on results.”

Benefits of Invisalign at Bekmezian Orthodontics

- Clear and Discreet: Invisalign aligners are made from smooth, BPA-free plastic that is nearly invisible, making them an ideal choice for those who want to straighten their teeth without noticeable hardware.
- Comfortable Fit: Custom-designed for each patient, the aligners eliminate the discomfort often associated with metal braces, such as irritation from brackets and wires.
- Removable Convenience: Patients can remove the aligners while eating, drinking, brushing, and flossing, promoting better oral hygiene and fewer dietary restrictions.
- Customized Treatment Plans: Using advanced 3D imaging technology, Bekmezian Orthodontics creates a precise treatment plan that maps out the gradual movement of teeth, ensuring effective and predictable results.
- Suitable for All Ages: Invisalign is an excellent option for both teens and adults seeking orthodontic treatment without the aesthetic concerns of traditional braces.

How Invisalign Treatment Works at Bekmezian Orthodontics

The Invisalign journey begins with a comprehensive consultation at Bekmezian Orthodontics, where patients receive a detailed evaluation and 3D scans of their teeth. These scans are used to design a personalized treatment plan that outlines the exact movements of the teeth and the estimated duration of treatment.

Patients then receive a series of custom-made aligners, which they wear for 20 to 22 hours per day, switching to a new set approximately every one to two weeks. Throughout the treatment, patients visit Bekmezian Orthodontics periodically for progress check-ups and to receive their next sets of aligners.

Commitment to Patient Care and Innovation

Bekmezian Orthodontics has built a reputation for combining expert orthodontic care with the latest technology and a patient-centered approach. The introduction of Invisalign services is a testament to the practice’s commitment to innovation and excellence.

“We understand that every patient’s smile journey is unique,” added Dr. Bekmezian. “By offering Invisalign, we empower our patients with a treatment option that adapts to their needs and lifestyle, while delivering outstanding results.”

About Bekmezian Orthodontics

Located in the heart of Costa Mesa, Bekmezian Orthodontics is dedicated to providing personalized orthodontic care for patients of all ages. With a focus on creating healthy, beautiful smiles, the practice offers a wide range of services including traditional braces, Invisalign, and other orthodontic treatments.
