

Best VPNs to Watch Hulu While Traveling Abroad in 2025

Cool Tech Zone, an expert on digital privacy and streaming solutions, has released its guide about the VPNs for watching Hulu while traveling abroad in 2025.

VILNIUS, LITHUANIA, LITHUANIA, June 6, 2025 /EINPresswire.com/ -- Hulu is a leading US-based streaming platform offering popular TV shows, original series, and films. However, its content is limited to viewers located within the United States. The American subscribers lose access while traveling internationally.

To help overcome these restrictions, Cool Tech Zone evaluated top VPN providers that allow users to stream Hulu securely and without interruption from anywhere in the world.

Logo

The report highlights three VPNs that stood out for their consistent streaming performance, strong security measures, and the ability to bypass Hulu's geo-blocking systems without sacrificing video quality.

Top VPNs to Stream Hulu While Traveling

Best Overall: [NordVPN](#) – Offers a great balance of speed, security, and ease of use. It includes access to a large number of US servers and supports smooth high-definition streaming.

Best for Multiple Devices: [Surfshark VPN](#) – Ideal for families or users with many devices. Surfshark offers unlimited connections and dependable access to Hulu across platforms.

Fastest for Streaming: [ExpressVPN](#) – Known for premium speeds and reliability, this provider excels at delivering seamless HD and 4K playback for travelers.

All VPNs were tested for their ability to unblock Hulu, maintain secure and private connections, and deliver stable performance on the go.

Why Use a VPN While Traveling?

Hulu restricts access based on location. A VPN assigns a US-based IP address, allowing travelers to watch as if they were back home. Premium VPNs also encrypt internet traffic, prevent tracking, and protect against DNS and IP leaks—making them essential for both access and privacy.

How to Watch Hulu Anywhere

Select one of the recommended VPNs

Install it on your device

Connect to a US server

Visit Hulu.com and log in or sign up

Start streaming securely from abroad

A Note on Free VPNs

Free VPNs often fail to bypass Hulu's detection and may compromise user privacy. Cool Tech Zone recommends using a trusted provider with a free trial or money-back guarantee.
