Possessions Accolades Poster

In Possessions, you change your view of the world until everything clicks into place — literally. Furniture floats mid-air, objects seem misplaced, but from the right angle, order is restored. And underneath this simple mechanic lies a quiet, wordless story about connection, clutter, and the things we hold onto.

“

We wanted to make something meditative — a game where solving puzzles feels like decluttering your own mind; It's not about challenge. It's about clarity.”

Chirag Chopra

From the creators of Stay-Mum, Bloom - a puzzle adventure, Possessions continues Lucid Labs' tradition of evocative design and emotional storytelling. The demo offers a first look at its unique perspective-based mechanics and meditative tone.

HIGHLIGHTS:

1. A minimalist, meditative puzzle experience inspired by

spatial illusions & emotional clarity.

2. Perspective-based gameplay that encourages thoughtful observation over fast reactions.

3. A narrative told without words — subtle, universal, and deeply personal.

4. A visual experience inspired by experimental art and environmental storytelling.
