

NaturePest Now Offers Eco-Friendly Fire Ant Control, Prioritizing South Florida Families and the Environment

NaturePest Holistic Pest Control in South Florida today announced the expansion of its services to include specialized eco-friendly fire ant control.

HOMESTEAD, FL, UNITED STATES, June 9, 2025 /EINPresswire.com/ -- NaturePest Holistic Pest Control, a leading provider of natural and organic pest management solutions in South Florida, today announced the expansion of its services to include specialized eco-friendly [fire ant control](#).

This new offering reaffirms NaturePest's commitment to effective pest elimination while ensuring the safety of children, pets, and the delicate South Florida ecosystem.

Fire Ant

“

We understand the urgent need for effective fire ant control in South Florida, but we also believe it shouldn't come at the expense of our environment or the health of our families,”

Franklin Hernandez

[Fire ants](#) pose a significant and frustrating challenge for homeowners throughout the region, disrupting outdoor activities and presenting painful risks. NaturePest's innovative approach leverages advanced, low-toxicity bait technologies to target fire ant colonies at their source, including the queen, for comprehensive and long-lasting elimination.

"We understand the urgent need for effective fire ant control in South Florida, but we also believe it shouldn't come at the expense of our environment or the health of

our families," said Franklin Hernandez, owner of NaturePest Holistic Pest Control. "Our new eco-friendly fire ant solutions are designed to deliver superior results while minimizing environmental impact, giving our customers peace of mind."

The efficacy of NaturePest's eco-friendly fire ant control lies in its strategic use of [fire ant bait](#)

with active ingredients that are considered low in toxicity. These products, such as those containing spinosad or insect growth regulators (IGRs) like methoprene, are designed to be carried back to the colony by foraging ants, ultimately sterilizing the queen and preventing the development of new worker ants, leading to colony collapse. This targeted approach significantly reduces the overall use of pesticides, making it a responsible choice for sensitive environments.

NaturePest's certified technicians conduct thorough inspections to identify fire ant activity and develop customized treatment plans. Their holistic approach not only focuses on eliminating existing infestations but also incorporates preventative measures to safeguard properties from future fire ant threats. Residents across South Florida can now enjoy their outdoor spaces without the worry of fire ant bites, knowing that NaturePest is protecting their property with effective, environmentally conscious methods.

About NaturePest Holistic Pest Control:

NaturePest Holistic Pest Control is a family-owned and operated company dedicated to providing natural, organic, and integrated pest management solutions for homes and businesses across Miami-Dade and Broward counties. Since its formation in 2014, NaturePest has become a trusted name in pest control, prioritizing the health and well-being of its clients and the environment through innovative and sustainable practices.
