The Business Research Company

The civilian turboshaft helicopter market has gained substantial momentum over the past years, with expected further growth observed in the near future. In 2024, the market size stood at \$6.84 billion, projected to reach \$7.33 billion by 2025, thanks to a compound annual growth rate

CAGR of 7.1%. This growth in the historical period is primarily due to the rising use of helicopters for air ambulance services, increasing offshore oil and gas exploration activities, growth in search and rescue operations, rising need for rapid transportation in remote areas, and a surge in the adoption of helicopters for aerial photography and tourism.

What Are The Projected Trends In The [Civilian Turboshaft  
Helicopter Market Size?](#)

Future projections for the market size are similarly striking,

expecting to reach \$9.51 billion by 2029 at a CAGR of 6.7%. This growth in the forecast period can be tied to increasing urbanization and traffic congestion, a rise in military to civilian helicopter conversions, a surge in private helicopter charters, and increased government investment in aviation infrastructure. Other factors contributing to the forecast period's growth include advancements in turbine engine technology, the integration of advanced avionics systems, developments in rotorcraft design and aerodynamics, technology advancements in materials and composites, and the incorporation of automation and unmanned technologies.

Who Are The Major Drivers For Civilian Turboshift Helicopter Market?

A crucial market driver that would thrust the civilian turboshift helicopter market forward is the burgeoning need for emergency medical services EMS. EMS offer rapid response for individuals with sudden illnesses or injuries, ensuring faster response times and access to specialized care, particularly in remote or congested areas. Civilian turboshift helicopters play a vital role in EMS by providing quick, reliable aerial transportation for medical teams and patients, thereby improving access to critical care both in urban and remote regions. As an example, in January 2025, LifeFlight, a US-based air ambulance and medical transport company, reported a 73% increase in people helped in 2024, as compared to 2023, while Townsville observed a 67% rise the same year.
