

Easily Moved Equipment Launches Pneumatic Caster for 6600R 3 Tonne Gantry Crane

eme adds 3-tonne caster to its pneumatic lineup, enabling full load mobility for 6600R gantry cranes across rough or uneven terrain.

FORT ERIE, CANADA, June 9, 2025 /EINPresswire.com/ -- Easily Moved Equipment (eme), the Lightweight Leader in Portable Lifting, has announced the release of its new 3 tonne-rated pneumatic caster set, designed exclusively for the [6600R aluminum gantry crane](#).

This caster set allows the 6600R crane to be [moved while fully loaded](#), even across rough or uneven terrain — a capability that sets it apart from traditional caster systems, which are often limited to unloaded rolling or flat indoor surfaces.

“

What makes this pneumatic caster special is that it's not just for new builds. You can retrofit your existing 6600R and instantly expand what your crane can handle — no new frame, no limitations.”

Kyle Flynn

“Most pneumatic casters can't handle real industrial loads — they're made for show, not for the shop floor,” said Kyle Flynn, President of eme. “This new caster changes that. It lets our 6600R crane roll fully loaded in environments that demand a more robust caster. As an example, roofers need to deal with loose gravel, while also trying to protect the roof surface.”

Key Features:

- Load Rating: Supports full 3 tonne (6,600 lbs) capacity of the 6600R crane
- Engineered for Movement Under Load: No derating or restrictions when rolling
- All-Terrain Design: Unique design and configuration allows users to navigate tougher environments

eme 6600R gantry crane shown with new 3 tonne-rated pneumatic casters, designed for full mobility under load.

- Industrial Control: Independent swivel and roll locks for safe positioning
- Retrofit-Ready: Works with all existing 6600R gantry cranes — no new frame required
- Product Family: Part of eme's growing line of pneumatic casters, including long-running 2 tonne models

With this release, eme expands its family of pneumatic casters, which began with its proven 2 tonne model that has been in the field for multiple years. The new 3 tonne caster set continues this legacy, offering customers a heavier-duty option for tougher environments without sacrificing mobility or performance. eme remains one of the only gantry crane manufacturers to offer fully mobile, load-rated pneumatic caster solutions across multiple capacities — combining industrial-grade durability with the portability of aluminum construction.

The pneumatic caster set is available now for new 6600R orders or as a retrofit upgrade for existing units in the field.
