# Aiarty Video Enhancer Debuts Triple Generative AI Models for Ultra HD Video Enhancement

Digiarty releases Aiarty Video Enhancer, the next-generation AI software to upscale, denoise, and restore details for videos with three dedicated AI models.

CHENGDU, SICHUAN, CHINA, June 10, 2025 /EINPresswire.com/ -- Aiarty, the visionary AI-focused brand from Digiarty Software, today announced the landmark debut of its flagship product, Aiarty Video Enhancer. This powerful software leverages the state-of-the-art AI technology to batch

Aiarty Video Enhancer Debut Release

upscale, denoise, and restore details for all video types, empowering video shooters and content creators to significantly improve video quality to modern 4K clarity.

As videographers require tools to denoise and remedy low-quality footage, AI explorers yarning for 720p to 4K upscaling in batch, general audiences expect crisper visuals with details, and anyone with old legacy clips want to bring back the clearest memories, Aiarty Video Enhancer is engineered to meet these needs, offering a better output quality at optimized processing speed – safely offline.

"For too long, users have had to choose between tolerating poor video quality or accepting AI enhancements that look unnatural," said Jack Han, CEO of Digiarty Software. "With Aiarty Video Enhancer, we're eliminating that compromise. Combining strengths from Diffusion and GAN technologies, our advanced AI models are trained to understand and reconstruct visual information with details, processing at turbo speed for superior quality."

Some of the existing AI enhancers often fall short, introducing unnatural artifacts, failing to recover critical details, taking hours to upscale a 5-minute video, or charging premium prices that alienate general users.

Aiarty Video Enhancer surpasses existing tools through its ability to denoise challenging scenes,

upscale to 4K, and restore details in critical areas like skin, hair, foliage, and fabric textures, mitigate common AI artifacts like the "painterly look", while offering batch processing and turbo mode for seamless workflow and efficiency.

It's an indispensable tool for enhancing everything from old home movies and grainy low-light recordings to anime, game videos, AI-generated videos, and professional camera clips.

Key Features of Aiarty Video Enhancer

1. Comprehensive AI-Powered Video Upscaling and Enhancement
As a one-stop solution to upscale, denoise, deblur, sharpen, and restore videos, it supports batch processing for efficient workflows and operates offline, ensuring user privacy and data security.
• AI video upscaling and quality improvement
• AI video interpolation: 30fps to 120fps, or create smooth slow motion
• AI audio enhancement: background noise reduction, vocal clarity boost
• Seamless quick editing: crop, flip, trim, and preserve audio tracks

2. Advanced Denoising for Low-Light Footage
It features a super denoiser optimized for rescuing grainy, murky, or high-ISO footage, and can automatically reconstruct clean, high-quality frames, making night scenes and dimly lit videos clearer.

3. Natural Detail Generation and Preservation
This AI video enhancer will reconstruct realistic and natural details as if captured natively in-camera, and it excels in enhancing fine textures like hair, skin, fabric textures, and outdoor plants, ensuring consistent and authentic results.

4. Optimized for Speed and Efficiency
With AI model optimization, Aiarty achieves 95% GPU utilization on supported hardware. Its "Turbo" option allows for x3 processing speed when compared to other tools, without compromising quality.

For a 25min@30FPS 2K video clip, upscaling to 4K takes just 25 minutes with Turbo mode on (Nvidia RTX5090, 8GB RAM), effectively processing at 30 frames per second in real time.

In contrast, other desktop software needs more than 1 hour for the same task.

5. Versatile Enhancement for Diverse Video Types

Dedicated AI models in Aiarty Video Enhancer cater to various needs, including restoring old footage, enhancing anime, upscaling AI-generated videos from 720p to 4K, and refining modern camera clips.

Three Distinct AI Models for Video Enhancement

Aiarty Video Enhancer features three distinct AI models, with 2.38 million images training dataset and 120 hours HD/4K videos training dataset, each model is meticulously optimized for specific enhancement tasks and scenarios, including live-action and animation videos.

1) moDetail-HQ v2 (Diffusion Plus GAN Technology):

The model excels at recovering fine textures, such as hair, skin and plants, and enhancing clarity in portraits and nature shots. It will denoise, deblur and sharpen footage, while generate natural details.

2) Smooth-HQ v2 (Diffusion Technology):

It provides balanced, natural deblurring and denoising, and preserves authentic color and texture. Smooth model works nicely for moderate imperfections needing subtle yet effective restoration.

3) superVideo vHQ (Diffusion Plus GAN Technology):

The model delivers industry-leading noise reduction and detail recovery in extreme low-light conditions, such as night skies, urban nightscapes, or dimly lit interiors where noise reduction is paramount.

Pricing and Availability
Aiarty Video Enhancer is available now for Windows and macOS. Users can download a free trial to test out the features, and purchase the software from the official page below:
https://www.aiarty.com/aiarty-video-enhancer/

Debut Release Offer (up to 30% off):
•Lifetime license-3PCs: $165 (Original price: $235), with a free gift of Aiarty Image Enhancer.
•1 Year Stand License-1PC: $79 (Original price: $99)

Available on both Windows and Mac.

The Aiarty team invites all video creators, YouTubers, gamers, vloggers, AI artists, e-commerce specialists, and anyone with precious footage to elevate their video quality to the next level.

About Aiarty
Aiarty is the AI-focused innovation brand from Digiarty Software, dedicated to developing cutting-edge multimedia solutions. With a talented team of passionate engineers dedicated to pushing boundaries, Aiarty develops cutting-edge AI tools meticulously crafted to elevate digital

experiences worldwide.

About Digiarty Software
Digiarty Software, the developer of Aiarty, WinXDVD, and VideoProc, is a leading provider of multimedia software solutions for over 18 years. Renowned for their unwavering commitment to quality, performance, and customer satisfaction, Digiarty boasts a diverse software suite encompassing DVD backup, iPhone management, video transcoding, editing, and more. The comprehensive offering has garnered over 256 million software installations across 180 countries. To get more info about the company, please visit its official web page:
