Recycling Water Filtration Market Report 2025 -
Market Size, Trends, And Global Forecast 2025-2034

What Is The Projected Market Size Of The Recycling Water Filtration Market?

The [recycling water filtration market size](#) has grown strongly in recent years and is projected to grow from \$2.65 billion in 2024 to \$2.86 billion in 2025.

”

*The Business Research
Company*

This compound annual growth rate CAGR of 8.2% can be attributed to the increasing demand for new water resources, consulting and advisory services, smart water solutions, pollution awareness, and pharmaceutical production.

How Is The Recycling Water Filtration Market Projected To Grow In The Coming Years?

The recycling water filtration market size is set for strong growth in the next few years, forecasted to reach \$3.90 billion in 2029 at a compound annual growth rate CAGR of

8.0%. The growth in the forecast period can be attributed to factors such as the burgeoning electronics industry, a growing emphasis on sustainable water management practices, increased demand for lightweight, flexible materials, rising concerns about contaminants and waterborne diseases, and increasing demand for new water resources. Major trends impacting forecasts include smart monitoring and IoT integration, advanced biological treatment, predictive maintenance using AI, cloud-based water management platforms, and advanced oxidation

processes.

What is Driving The [Growth of The Recycling Water Filtration Market](#) Going Forward?

The market's momentum is expected to be maintained by increasing industrial activities. The term refers to processes involved in the production, manufacturing, and processing of goods across sectors such as mining, construction, and utilities. The increased industrial activities are the result of globalization, which has expanded access to international markets, enabled cost-effective production, and facilitated the transport of goods and resources across borders. Recycling water filtration decreases freshwater usage, reduces wastewater disposal costs, and ensures a sustainable water supply for industrial activities such as cooling, cleaning, and manufacturing.

Who Are The [Major Players In The Recycling Water Filtration Market](#)?

Key industry players are Veolia Environnement SA, Danaher Corporation, KUBOTA Corporation, Toray Industries Inc., Ecolab Inc., SUEZ SA, Xylem Inc., Toshiba Corporation, Pentair plc, Select Water Solutions, Kurita Water Industries Ltd., Amiad Water Systems Ltd., Hydro Engineering Inc., Koch Membrane Systems, INTEWA GmbH, Epic Cleantec Inc., Hydraloop Systems BV, European WaterCare Ltd., EnviroWater Group, AquaRecycle, and Forsta Filters Inc.

What Are The Major Trends In The Recycling Water Filtration Market?

The players in the market are focused on developing technologically innovative solutions to increase water efficiency and reduce costs for residential and industrial applications. One such innovation is the all-in-one greywater recycling system, a compact solution that filters and reuses wastewater for non-potable purposes like irrigation and toilet flushing.

How Is The Recycling Water Filtration Market Segmented?

The recycling water filtration market is segmented by:

- 1 Product Type: Sand Filters, Multimedia Filters, Activated Carbon Filters, Membrane Filters
- 2 Water Source: Groundwater, Seawater, Surface Water
- 3 Membrane Type: Microfiltration MF Membranes, Ultrafiltration UF Membranes, Nanofiltration NF Membranes, Reverse Osmosis RO Membrane
- 4 Application: Agricultural Irrigation, Desalination, Power Generation, Recreational Water Facilities, Wastewater Treatment
- 5 End-User: Power Generation, Oil And Gas Plants, Food And Beverage, Pharmaceuticals, Others

Additionally, subsegments for each category include:

- 1 Sand Filters: Rapid Sand Filters, Slow Sand Filters, Pressure Sand Filters, Gravity Sand Filters
- 2 Multimedia Filters: Dual Media Filters, Triple Media Filters, High-Rate Multimedia Filters
- 3 Activated Carbon Filters: Granular Activated Carbon GAC Filters, Powdered Activated Carbon PAC Filters, Catalytic Carbon Filters
- 4 Membrane Filters: Microfiltration MF, Ultrafiltration UF, Nanofiltration NF, Reverse Osmosis RO

On A Regional Basis, How Is The Recycling Water Filtration Market Performing?

North America accounted for the largest share of the recycling water filtration market in 2024, while Asia-Pacific is forecasted to be the fastest-growing region in the upcoming years. The report covers diverse geographical locations including Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East, and Africa.
