

Solix Launches Solix ECS AI—Bringing Secure, Compliant AI to Enterprise Content

Cloud content services platform delivers GenAI-powered intelligent search, summarization, Q&A, data extraction, and workflow automation securely and at scale.

SANTA CLARA, CA, UNITED STATES, June 10, 2025 /EINPresswire.com/ -- Cloud content services platform delivers GenAI-powered intelligent search, summarization, Q&A, data extraction, and workflow automation securely and at scale.

Solix Technologies, Inc., today announced the launch of [Solix ECS](#) AI, a next-generation enhancement to its Enterprise Content Services (Solix ECS) platform. By layering advanced large language model (LLM) capabilities onto the proven Solix ECS foundation, the new offering enables organizations to unlock actionable insight from their unstructured data while strengthening governance and compliance.

“Enterprises are under pressure to do more with the information trapped in millions of documents and messages,” said Kalyan Manyam, VP of Enterprise Workgroup Solutions at Solix. “Solix ECS AI brings advanced generative intelligence directly into daily workflows, so teams spend less time searching for insights and more time making data-driven decisions—without compromising security.”

Key Capabilities

- Multi-Document Q&A & Summarization – Ask natural-language questions across entire repositories and receive concise answers or executive summaries in seconds.
- AI-Generated Content – Instantly draft sales emails, dunning letters, contracts, RFP responses, and more, grounded in governed enterprise content.
- Intelligent Data Extraction & Classification – Capture structured data from invoices, forms, images, and free-form text while auto-classifying records for lifecycle management.
- AI-Driven Workflows – Trigger approvals, escalations, and retention policies based on real-time understanding of document context.
- Deployment & Model Flexibility – Choose public SaaS, private SaaS, or on-prem deployment and switch between leading LLMs to match security and performance requirements.

Solix ECS AI is built with IBM [watsonx.ai](https://www.ibm.com/watsonx/ai), an enterprise-grade AI studio designed to help AI builders build AI solutions. ([Learn more](#))

Availability

Solix ECS AI is available immediately on SOLIXCloud, via public and private SaaS, and for on-premises deployment. Existing Solix ECS customers can enable AI features through a simple license upgrade.

About Solix Technologies

About Solix Technologies: Solix Technologies is a global leader in enterprise data management and enterprise AI solutions, helping businesses globally drive digital transformation with secure, compliant, and efficient data governance solutions.
