

# SUMEC Hardware & Tools Showcases Complete Battery-to-Mains Line-Up at 'Industry Tools by Ferroforma 2025'

*PowerG 20 V brushless ecosystem and Yard Force cordless OPE headline the brand's largest Iberian exhibit to date.*

BILHAO, SPAIN, June 11, 2025

/EINPresswire.com/ -- SUMEC

Hardware & Tools Co., Ltd. drew record crowds in Hall 3 of Industry Tools by Ferroforma 2025 this week, unveiling more than forty new products across its registered European trademarks [PowerG](#) and Yard Force. From compact cordless drills to a zero-emission ride-on mower, the stand demonstrated how SUMEC is helping dealers migrate every corner of the workshop and garden from petrol or corded power to next-generation lithium solutions.

**Yard Force: Seven New Machines for the Garden Season**

Visitors were greeted by live demos of the ProRider 60 V ride-on mower, a quiet, battery-powered unit that covers up to 6,000 m<sup>2</sup> on a single charge while delivering instant torque and fingertip speed control. Beside it, three dual-battery walk-behinds – the LM C34B, LM C37B and LM C40B – showed how two interchangeable 20 V packs can drive 34 cm, 37 cm and 40 cm steel decks with the push of a button; vertical-fold handles cut garage storage by 70 percent.

Yard Force in Ferroforma 2025

For customers who still prefer petrol, Yard Force introduced the GM H51, a 51 cm self-propelled mower powered by a Honda GCV170 engine and equipped with a one-touch height lever and 4-in-1 clipping management. Rounding out the garden range were two high-pressure cleaners for everyday patios and vehicles.

#### PowerG: One Battery, Dozens of Brushless Possibilities

At the heart of SUMEC's indoor display sat a wall of PowerG® 20 V tools. Every model shares the same 2.5 Ah to 5 Ah lithium-ion pack and a one-hour fast charger, simplifying life for retailers and end users alike. Highlights include:

- brushless drill/driver with two-speed gearbox and 20-stage clutch for precise torque control;
- brushless impact drill for masonry work;
- an impact wrench supplying break-away torque with three electronic speed modes;
- 185 mm circular saw and 125 mm angle grinder—both brushless—to give DIYers corded performance without the cord;
- rotary hammer, belt and detail sanders, planer, oscillating multi-tool, jig saw, reciprocating saw and a high-output spray gun for rapid fence and furniture refinishing;
- job-site essentials such as an LED work light, dual-stage compressor/air-pump for tyres and inflatables, and a nail-and-staple gun capable of hundreds of shots per charge.

#### Heavy-Duty AC Line Extends Reach to Trade Pros

To complement the cordless surge, SUMEC revealed a suite of professional-grade mains tools. New rotary hammers, demolition hammer, wet/dry vacuums, dirty-water pump and a paddle mixer allow contractors to outfit an entire crew from a single vendor while relying on robust copper-wound motors and reinforced gear housings.

"Spanish and Portuguese distributors told us they want a single partner who can carry their customers from entry-level DIY right through to petrol-replacement landscaping and site-ready AC," said Patrice Burnichon, Managing Director of SUMEC France Sarl, "With PowerG for the toolbox and Yard Force for the garden, that full-spectrum solution is now on their doorstep."

#### About SUMEC Hardware & Tools Co., Ltd.

SUMEC Hardware & Tools develops and manufactures innovative, environmentally responsible outdoor-power and hand-held power solutions. Its brands Yard Force and PowerG—both registered in Europe—are sold in more than 50 countries worldwide.
