network services expands coverage to  
Greater Sacramento & surrounding  
NorCal counties.*

ProSat Networks Expands Starlink Services to Greater Sacramento, California

ROSEVILLE, CA, UNITED STATES, June 16, 2025 /EINPresswire.com/ -- [ProSat Networks](https://www.einpresswire.com/ProSat-Networks), a professional Starlink installation and onsite IT support services company for commercial businesses, residential homeowners, mobile vehicles and maritime vessels, has officially announced their expansion of Starlink installation services in Greater Sacramento, Northern California (NorCal), USA.

“

Starlink is a great option for businesses and residents of northern California where fiber optic and other ISP options are unavailable or fall short of true high-speed broadband internet.”

*ProSat Networks  
spokesperson*

"Northern California is embracing the future of connectivity with Starlink. Whether it's supporting homes & businesses in greater Sacramento, north to Yuba City or south to Stockton and beyond, or in the Sierra Nevada foothills, businesses and agricultural operations in the Central Valley, RVs exploring the diverse landscapes or boats navigating the Delta waterways to the Pacific Ocean, demand for professional Starlink installation is growing rapidly across NorCal" said a ProSat Networks spokesperson.

According to recent reports from the California Public Utilities Commission and the California Broadband Office, hundreds of thousands of Californians, especially in rural counties, mountainous regions and remote communities, still lack access to reliable high-speed broadband internet. From the sprawling Sacramento metropolitan area to remote locations and isolated communities throughout the seven-county Greater Sacramento region, traditional fiber-optic infrastructure, cellular and other antiquated ISPs (internet service providers) often fail to reach the state's most underserved areas. Starlink is now available to help bridge this gap called

the digital divide.

Unlike traditional ISPs that rely on costly fiber-optic cable, Starlink delivers low-latency, high-speed broadband internet directly from LEO (low-Earth orbit) satellites orbiting approx. 250 miles above the Earth's surface vs. traditional GEO (geostationary) satellites that orbit at approx. 23,000 miles. This allows urban, suburban and rural businesses, homes, farms, schools, hospitals, clinics, RV parks, campgrounds, hotels, resorts, airports, mobile vehicles, and even marinas along the Delta waterways to stay connected with reliable, high-speed internet.

To meet the growing demand, ProSat Networks is now offering professional Starlink installation services in Greater Sacramento for:

#### 1. FIXED LOCATIONS

CA Commercial Businesses – Small business & Enterprise-grade [Starlink business installation](#), expert IT network integrations with Starlink as the primary or backup ISP for business-class IT networks, including technology companies, government facilities, airports, airplane hangers, agricultural operations, manufacturing facilities, retail stores, RV parks, campgrounds, marinas and tourism businesses.

CA Residential Homes – Reliable high-speed internet is now accessible for remote work, healthcare, e-learning, gaming, streaming—residential rooftop installation in urban and rural Greater Sacramento communities.

Internet Communities in California (wired & wireless) – High-performance commercial-grade Starlink installations within a defined community where only members are granted user access

Starlink Business Installation Services Greater Sacramento CA

to the Starlink network. Internet communities may be organized by any hard-wired structures such as data-cabled apartment buildings, condos and commercial buildings, or wirelessly by household (neighbors living within a certain proximity of each other), HOAs, RV parks, campgrounds, hotels, motels, resorts, retreat communities, marinas and more. In an internet community, users or household groups have their own defined levels of access and data usage while sharing the same Starlink terminal (dish).

Starlink internet communities distribute internet access to multiple locations via a wireless mesh network, P2MP (point-to-multi-point) and/or P2P (point-to-point direct line of sight) WiFi networks and hard-wired/cabled with fiber-optic cable, Cat5, Cat6, etc. LANs (local area networks) & WLANs (wireless local area networks). ProSat Networks offers wired and wireless network design, installation and ongoing support for internet communities such as GIS (Guest Internet Systems) for hotels, RV parks, campgrounds and marinas as well as public and private shared internet community networks in Northern California.

## 2. MOBILE AND MARITIME INSTALLATIONS

Mobile Vehicles & Motorhomes – Internet on the go for RVs, service vehicles, mobile medical units, emergency vehicles, tour buses and motorhomes exploring Northern California's national parks, wine country, Lake Tahoe region, and outdoor recreation areas.

Starlink Maritime for Boats – Maritime installers available throughout Northern California's extensive Delta waterways, lakes, and reservoirs to install, repair or upgrade your Starlink maritime solution on your sailboat, yacht, motorboat/cruiser, fishing vessel, houseboat and

## Starlink Military Discount for Veterans & Spouses on Installation in California

Starlink for Events, at the Beale AFB Air Show 2025

really just about anything that floats! Sacramento Delta and Northern California lake Starlink maritime internet solutions and mobile data plans are available.

3. Starlink for Events – ProSat Networks was honored to recently setup a couple "Starlink" free WiFi Zones at the Beale AFB Air Show 2025. The 2 free open WiFi networks supported 100's of attendees (simultaneous users) and much of the media simultaneously while sending and receiving photos, videos, making calls (and video calls), sending texts and broadcasting live streams via the Starlink WiFi networks provided by ProSat Networks. There was ZERO downtime the entire weekend, averaging over 300mbps download and 30mbps upload speeds.
