By Application:

Prescription and OTC drugs, wellness, diagnostics, chronic care

Definition:

Today we witness a phase transition of buying pattern of any goods, clothes, electronics, furniture, grocery, etc. With the initiation of new technology, offline shopping switches to online mode. Buying anything online is in trends. Buying drugs or medicines online is the latest trend amongst patients and consumers. With this growing trend of buying medicines online, the number of online pharmacies also increase. However, there is a lack of proper regulatory forms and balances for exercising regulatory control over e-pharmacies. There are some other aspects which also fuel the gearing up of e-pharmacies such as increased number of netizens, long term illness patients and increased chronic diseases.

Dominating Region:

North America, Europe

Fastest-Growing Region:

Asia-Pacific

Market Trends:

- Increased internet penetration, convenience, pandemic-driven digital adoption

Market Drivers:

- Shift toward digital health, app-based order-tracking, same-day delivery

Challenges:

- Regulatory variability, trust deficit, data privacy and cyber threats
