"*They're Back* is me taking a look at the joys and beauty of nature and wanting others to share that experience," Montgomery explains. "The idea came from a personal experience, an encounter with a white wolf that made me realize just how deeply connected we are to the wild. Wolves are one of the most misunderstood and persecuted animals in history, and I wanted to show that they deserve a place here, just as much as we do."

Montgomery's background as a conservation writer and decades of outdoor exploration inform his storytelling, which highlights the interconnectedness between people and the planet. His work encourages readers to spend more time in nature, to notice the beauty in its rhythms, and to take on the responsibility of being caretakers.

His message echoes recent encouraging news. According to a May 2025 report by the [Center for Biological Diversity](#), three new wolf packs have been confirmed in California, a promising sign for the species and a testament to the resilience of nature when given the chance to recover.

“Wolves returning to California is a reminder that healing is possible,” Montgomery says. “It takes understanding, patience, and effort, but nature is capable of amazing things when we give it the space and respect it needs.”

From children’s literature that instills wonder and stewardship at a young age to novels that stir emotional and philosophical thought, Montgomery’s work is rooted in a love for the outdoors and a desire to help others rediscover that same connection.

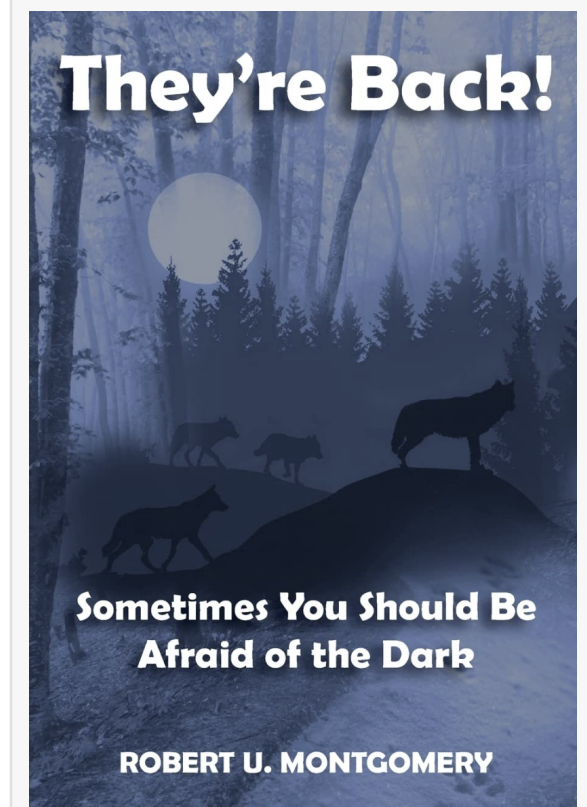

“I used to feel angry when I saw trash in the woods,” he reflects. “But that changed when I began picking it up. It’s not about blame, it’s about doing what we can. We all have a role to play, and it starts with simple, personal choices.”

Montgomery’s stories are driven by presence. By encouraging people to look up from their screens and return to the woods, the rivers, and the wide skies, he reminds readers of something essential: nature isn’t something separate from humanity; it’s a part of its identity.

“This isn’t your world or mine,” Montgomery concludes. “This planet belongs to all of us. And together, we can choose to make it better.”
