

# Meeting ESG Goals with Confidence: How IPT Well Solutions' Greenhouse Gas Reports Support Sustainability Initiatives

*Delivering Audit-Ready Greenhouse Gas Reports to Strengthen Environmental Disclosures and ESG Strategies*

DENVER, CO, UNITED STATES, June 15, 2025 /EINPresswire.com/ -- As environmental benchmarks continue to influence investment decisions and corporate strategy, [IPT Well Solutions](#) is helping companies elevate their sustainability efforts with accurate, audit-ready greenhouse gas reports.

These reports are designed not only to ensure regulatory compliance but to also serve as a cornerstone for transparent environmental disclosures.

IPT Well Solutions, a trusted subsurface engineering and consulting firm, has expanded its [greenhouse gas reporting services](#) to meet the growing demand for defensible emissions data. With evolving SEC climate disclosure rules and increasing investor scrutiny, companies in energy, carbon capture, and heavy industry must go beyond minimum compliance, and IPT is helping them do just that.

"In today's regulatory and investment landscape, oil and gas operators are under intensifying pressure to quantify and reduce emissions with precision and transparency," said David C. Mannon, CEO at IPT Well Solutions. "We deliver technically rigorous greenhouse gas inventories rooted in EPA and GHG Protocol methodologies, ensuring alignment with environmental disclosure requirements and providing stakeholders with auditable, engineering-grade data they can trust."

IPT's greenhouse gas reports integrate seamlessly with broader sustainability goals, providing:

- Scope 1, 2, and 3 emissions assessments

- Baseline inventories for carbon management planning
- Custom reporting formats aligned with TCFD, GRI, and CDP standards
- Third-party defensibility for audit or investor review

With a strong track record across oil and gas, carbon capture, geothermal, and hydrogen sectors, IPT's reporting team ensures that each client receives tailored insights that support both compliance and long-term climate strategies.
