

Acute Hospital Care Market Report 2025: Strategies for Companies Seeking Expansion, Growth & Competitive Advantage

The Business Research Company's Acute Hospital Care Global Market Report 2025 – Market Size, Trends, And Global Forecast 2025-2034

LONDON, GREATER LONDON, UNITED KINGDOM, June 16, 2025

/EINPresswire.com/ -- What Does The Data On The [Acute Hospital Care Market Size](#) Indicate?

The [acute hospital care market](#) size has grown strongly in recent years. It will grow from \$3,088.75 billion in 2024 to \$3306.03 billion in 2025 at a compound annual growth rate CAGR of 7.0%. The growth in the historic period can be attributed to the rising incidence of chronic diseases, the aging global population, healthcare infrastructure expansion, increased emergency room visits, and urbanization.

The Business Research Company's Latest Report Explores Market Driver, Trends, Regional Insights - Market Sizing & Forecasts Through 2034"

The Business Research Company

How Might The Acute Hospital Care Market Size Change In The Near Future?

The acute hospital care market size is expected to see strong growth in the next few years. It will grow to \$4,300.23 billion in 2029 at a compound annual growth rate CAGR of 6.8%. The growth in the forecast period can be attributed to increasing demand for specialized acute

care facilities, a rise in multi-morbidity cases, an aging global population, an increase in lifestyle-related diseases, and a surge in critical care beds globally.

Major trends in the forecast period include integration of electronic health records EHRs with smart analytics, advanced robotics and automation in surgery, telemedicine and telehealth integration, cloud-based healthcare solutions, and blockchain for healthcare data security.

What Is Driving The Growth Of The Acute Hospital Care Market?

The rising prevalence of chronic diseases is expected to propel the growth of the acute hospital care market going forward. Chronic diseases are long-lasting health conditions that persist for a year or more and require ongoing medical attention or limit activities of daily living. The growing prevalence of chronic diseases is mainly due to aging populations and lifestyle-related risk factors. Acute hospital care manages the exacerbations of chronic diseases, providing immediate, intensive treatment and stabilization to prevent complications and improve patient outcomes. Furthermore, in October 2024, the Centers for Disease Control and Prevention CDC reported that approximately 5% of adults aged 20 and older, or 1 in 20, have coronary artery disease CAD. Therefore, a steady rise in chronic diseases will continue to fuel the growth of the acute hospital care market.
